Jaix Admin - ACCESS, SECURITY AND AUTOMATION

EDI

MEDI-255		JaixAdmin > System > EDI > Profiles Implemented profile level email notifications for EDI profiles.
MEDI-289	 	JaixAdmin > System > EDI > Format Builder Linehaul fleet and manifest trailers number fields were added to consignment EDI export.
MEDI-266		JaixAdmin > System > EDI > Format Builder Jaix Docket EDI Export formats have new Advanced Grouping function which includes Docket Item Exchange References. Any unique Reference will be used when grouping/splitting Detail Lines during EDI Export.
MEDI-318		JaixAdmin > System > EDI > Format Builder Added the ability to set consignment and job as depot dropped from EDI import.

MEDI-326		JaixAdmin > System > EDI > Format Builder Added a third Quantity field within the EDI Export field list for Dockets. This Quantity field will display the converted Pick Put Unit Quantity, instead of using the Configuration Set Default EDI Out Unit.
----------	---	---

JA-461		JA > Debtors Implemented Unpaid invoice function for debtors.
JA-469		JA > Payroll Accounts > Employees Implemented employee training and performance history search and list.
JA-442		JA > General Ledger Implemented access to journal entries from General Ledger Transactions Search & List.
JA-456		JA > General Ledger Implemented Reference 2, 3 and 4 on Bank deposit list data set.

General

JF-1666		JF > Freight > Pickups New debtor setting implemented to bypass local zone cut off time validation.
JF-1626		JF > Freight > Analysis > Reports Performance report shows transit time in hours.

JF-1032	  	JF > Customers > Additional Charges > Search & Setup Additional Charges - handle commission based on "Apply To" setup.
JF-1041		JF > Process > Courier > Print/Email LDM Implemented LDM email content changes.
JF-1625		JF > Tools > Setup > System Setup Implemented change from days to hours in transit time setup table.

Jobs

JF-155 4		JF > Freight > Jobs Implemented standard subcontractor rating in jobs where subcontractors are non commission type.
JF-154 1		JF > Freight > Jobs Implemented new status codes for futile Pickup and delivery for better visibility.

Consignments

JF-139 1		JF > Freight > Consignments Implemented recharge of consignment and job to auto populate POD Details only from Parent.
JF-171 8		JF > Freight > Consignments Fixed an issue where totals in Manifest > Consignment grid were showing also those from unit flagged as No Show.
JF-135 8		JF > Freight > Consignments Added 'Find' option on Unshipped Planning.
JF-149 9		JF > Freight > Consignments > Add/Edit/View Implemented new "Undo Delivery Complete" function within the PUP/DEL Attempts form for Consignment and Jobs.
JF-141 7		JF > Freight > Consignments > Add/Edit/View Implemented a check in consignments as result locked status consignments cannot be cancelled.

JF-1319		JF > Freight > Consignments > Add/Edit/View Fixed an issue due to which auto apply additional charge was not getting applied when service was changed.
JF-1648		JF > Freight > Consignments > Add/Edit/View Added log and exception handling to \$0 GST issue.
JF-1675		JF > Freight > Consignments > Add/Edit/View Added Taken At field and the ability to delete temperature readings in License Plate window.
JF-1660		JF > Freight > Consignments > S&L Implemented dynamic query building for Consignment Search and List.

Distribution

MEDI-303		JF > Distribution > Linehaul Manifests Added new setting to trigger manifest export for departed only manifests.
JF-1646		JF > Distribution > Linehaul Manifests > S&L Implemented trailer temperature set point fields for trailer loads.
JF-1661	  	JF > Distribution > Linehaul Manifests > S&L Apply new filtering menu on Manifest Search and List.
JF-1574		JF > Distribution > Despatch Implemented ability to print consignment labels from allocation screen.
JF-1629		JF > Distribution > Despatch Fixed grid conditional formatting not getting applied correctly in allocation screen and linehaul console.
JF-1820		JF > Distribution > Despatch > Allocations Set default to Yes on pickup confirmation prompt.
JF-1349		JF > Distribution > Despatch > Allocations Performance improvement in allocation screen.

JF-1559		JF > Distribution > Despatch > Allocations Add the ability to allocate all pre allocations for a fleet group or across all listed Fleet.
JF-1578		JF > Distribution > Reports Added new form printing for Emergency Breakdown Report.

MAPVIEW

JMV-22		MapView Performance improvement in Job loading in allocation screen.
JMV-25		MapView > MapView > MapView > Map Implemented profiles in Jaix Mapview.
JMV-27		MapView > MapView > MapView > Map Implemented Jobs filtering in Mapview as per fleet selection.

MOBILITY

General

MMB-462		Mobility JaixDriver & SmartSCAN support for Android 9 and 10.
---------	--	--

Jaix Driver App

MMB-582		Mobility > JaixDriver JaixDriver will now show Local Dropped to Depot allocation type Jobs.
MMB-483		Mobility > JaixDriver Implemented Product Reading entry for Jaix Driver.
MMB-465		Mobility > JaixDriver Implemented Ability to capture signature for pickups in Jaix Driver.

SmartSCAN

SmartSCAN (WMS)

MMB-468		Mobility > SmartSCAN (WMS) SmartSCAN - new ability to Select Handling Unit Type on Put Dockets.
MMB-475		Mobility > SmartSCAN (WMS) Implemented showing Product DG Code and Product Attribute in Smart Scan WMS.
MMB-519		Mobility > SmartSCAN (WMS) Added the ability to add separate Put and Pick Instructions to Product Records that display on SmartSCAN Devices when completing dockets.

SmartSCAN (Freight)

MMB-491		Mobility > SmartSCAN (Freight) Implemented License plate number for Detail Line Linking and Pallet number Entry in SmartScan.
---------	---	--

ONLINE

JPT-24 0		Portal System now shows Default Pick Unit or Default Measure by Default on the add product grid for Portal WMS Orders.
JPT-24 9		Portal Portal - New ability to Search T&T screen by Job 'Detail Line Reference'.
JPT-20 7		Portal Implemented Portal transit time validation from days to hours.
JPT-21 2		Portal Added product third party reference to SOH report in WMS Portal.

Operations

JWM-571		WMS > Operations > Activity Implemented new filter options for WMS Activity report.
JWM-503		WMS > Operations > Activity Docket Ratings Logs will now be available to view after an invoice process has been completed for all dockets going forward.
JWM-340	 	WMS > Operations > Activity > Putaway Enabled the ability to Quarantine Put Dockets without enabling auto quarantine for a Debtor.
JWM-133		WMS > Operations > Activity > Pick Save Handling Unit Type Selection Automatically on Put Dockets Allocations Screen.
JWM-570		WMS > Operations > Track > Movements Added the ability to view Movements for all Warehoused from Head Office Branch in the Track Movements Screen.

Process

JWM-653	WMS > Process > Generate Invoices Removed backup database prompt when running WMS Invoice Process.
MRP-173	WMS > Process > Reports Implemented part-picked product group fields in WMS charge Summary Report.
JWM-572	WMS > Process > Reports Changes to the WMS Customer Charges Summary Report to better show Consolidated Storage Charges.

JWS-271	WS > Inventory Implemented new form Costed job sheet in Jaix Workshop.
---------	---

ISSUE RESOLUTION

Accounts

JA-485	JA Resolved an issue in Accounts due which unallocation of transaction was not working.
JA-444	JA > Debtors > Main > Search & Setup > Information > View Transactions Running balance in debtors Unallocated Transactions View now shows unallocated amounts instead of debit amounts
JA-553	JA > Debtors > Main > Transactions / Receipts Fixed an issue in Debtor transaction front screen where it retained last transaction details after full allocation of a receipt to a Master account.

MRP-168	JA > Debtors > Invoices > Manage Resolved an issue in Jaix Accounts which was generating an exception when multiple invoices with PODs were emailed.
JA-540	JA > Debtors > Invoices > Manage Resolved an issue in Accounts due to which Freight/WMS invoices were not being emailed to CC email addresses.
JA-547	JA > Assets > Fleet > Co. Fleet Fixed an issue in Accounts due to which exception was being generated on changing asset finance details.
JF-1969	JA > Assets > Fleet > Co. Fleet > Fleet Setup Fixed an issue in Accounts where driver name was not loading correctly in asset details.
JA-481	JA > Tools > Setup > System Setup > Setup > Invoices Fixed issue where invoice item can have the same code.

Freight

General

JF-1906	JF > Freight > Pickups > Add/Edit/View Fixed issue where print options were not all displayed when creating new pick up.
JF-1596	JF > Freight > Quick Quotes Fixed an issue in Quick quotes due to which comments were not getting copied over to consignments.
JF-1902	JF > Tools > Main > Form Manager Fixed an issue in rate proposals printing due to which weights were incorrectly printed.
JF-1583	JF > Tools > Main > Imaging Resolved an issue in Imaging due which scanning was failing for transship and split consignments.

Consignments

JF-1651	JF > Freight > Consignments > Add/Edit/View Fixed an issue in consignments which was causing forwarding revenue fields not getting updated when forwarders were changed.
GEN-245	JF > Freight > Consignments > Add/Edit/View Fixed an issue in Default Report Output where selecting Preview disabled Printer and Copies fields.

Distribution

JF-182 1	JF > Distribution > Linehaul Manifests > Add/Edit/View Fixed an issue where an exception was throwing when opening a Manifest with inactive trailers.
JF-192 5	JF > Distribution > Linehaul Manifests > Add/Edit/View Added validation to manifest fuel top ups entry to prevent 0 litres entry.
JF-191 8	JF > Distribution > Trailer Loads > Add/Edit/View Resolved an issue in trailer load where qty and pallet space were not updating correctly when consignments were added to trailer load.
JF-191 1	JF > Distribution > Trailer Loads > Add/Edit/View Resolved an issue in Trailer load where consignment grid changes were not saving.
JF-188 8	JF > Distribution > Trailer Loads > S&L Fixed exception when viewing manifest on Trailer Load S&L.
JF-100 3	JF > Distribution > Runsheets > Add/Edit/View Fixed issue where runsheet form view is being closed right away when hitting Esc key.
JF-185 8	JF > Distribution > ADMs > Add/Edit/View Fixed an issue in Freight ADMs which was generating an exception on completing paperwork return.
JF-194 8	JF > Distribution > LDMs > S&L Fixed issued where LDM records were not displayed on LDM Search and List
JF-187 7	JF > Distribution > Despatch > Allocations Fixed issue where Pending Arrival flag was unflagged on a profile after switching from allocations to despatch.

JF-165 9	JF > Distribution > Despatch > Allocations Fixed issue where Consignment was not removed from Allocation's unshipped grid when it is loaded to a departed Manifest.
JF-168 1	JF > Distribution > Despatch > Allocations Fixed issue on allocation where delivery is not listing properly on correct depatch date when switching allocation type.
JF-189 2	JF > Distribution > Despatch > Load Planning Fixed issue on planning pad where Linehaul Code, Destination Depot and Origin Depot can be cleared.

MapView

General

GEN-257	MapView > MapView > MapView > Admin Resolved an issue in Mapview due to which shared profile to a user was not being shown.
---------	--

Portal

General

JPT-244	Portal Fixed an issue in WMS portal due to which earlier entered product lines were disappearing.
---------	--

Mobility

SmartSCAN (WMS)

MMB-463	Mobility > SmartSCAN (WMS) Fixed an issue where consolidated pallets were unable to be put away using the SmartSCAN devices.
---------	---

Jaix Driver App

MMB-486		Mobility > JaixDriver Enhance syncing speed on Jaix Driver.
---------	--	--

EDI

General

MEDI-281		JF > Freight > Jobs Resolved an issue in EDI due to which EDI job exports were not working for local jobs.
MEDI-262		JaixAdmin > System > Main > Branch List Fixed an issue in WMS due to which imported docket email was not getting formatted well.
MEDI-277		JaixAdmin > System > EDI > Profiles Fixed a consignment rating issue for EDI imported consignment with pickups.

WMS

Customers

JWM-625		WMS > Customers > Products Resolved issue whereby system would permit deleting a config set that is on an unsaved docket.
JWM-598		WMS > Customers > Rates > Find/Setup Fixed an error where referencing a new break rate in an existing break rate rate could cause an error when saving a rate schedule.

Operations

JWM-704		WMS > Operations > Activity This task ensures that Requires Service option toggles are linked correctly and only forcing validation on Service when turned on.
---------	--	---

JWM-701		WMS > Operations > Activity Resolved an issue in WMS due to which chargeto and carriers were not saving correctly.
JWM-708		WMS > Operations > Activity > Putaway Fixed issue whereby the Serial field shows in the Stock Details Window grid, even when not enabled for a product. It will now only be in the grid if it is enabled.
JWM-603		WMS > Operations > Activity > Pick Resolved an issue in WMS where duplicate services were being displayed in pick dockets.
JWM-495		WMS > Operations > Stocktake Fixed an issue where products of different product codes would incorrectly validate as mixing products when swapping their locations on a stocktake.
MRP-141		WMS > Operations > Reports Resolved issue whereby SOH Detailed Report does not list Child LPNs for consolidated pallets.

Process

JWM-631		WMS > Process > Reports Fixed an issue where Serial Numbers were not always showing on the CSV by License plate report.
---------	--	--

Workshop

Jobs

JWS-309		WS > Jobs > Jobs > AMP Fixed issue whereby Labour Cost \$ field does not refresh after new Labour Code & Employee selection.
---------	--	--

Jaix Admin - ACCESS, SECURITY AND AUTOMATION

EDI

MEDI-255		JaixAdmin > System > EDI > Profiles Implemented profile level email notifications for EDI profiles.
MEDI-289	 	JaixAdmin > System > EDI > Format Builder Linehaul fleet and manifest trailers number fields were added to consignment EDI export.
MEDI-266		JaixAdmin > System > EDI > Format Builder Jaix Docket EDI Export formats have new Advanced Grouping function which includes Docket Item Exchange References. Any unique Reference will be used when grouping/splitting Detail Lines during EDI Export.
MEDI-318		JaixAdmin > System > EDI > Format Builder Added the ability to set consignment and job as depot dropped from EDI import.
MEDI-326		JaixAdmin > System > EDI > Format Builder Added a third Quantity field within the EDI Export field list for Dockets. This Quantity field will display the converted Pick Put Unit Quantity, instead of using the Configuration Set Default EDI Out Unit.

ACCOUNTS

JA-461		JA > Debtors Implemented Unpaid invoice function for debtors.
JA-469		JA > Payroll Accounts > Employees Implemented employee training and performance history search and list.
JA-442		JA > General Ledger Implemented access to journal entries from General Ledger Transactions Search & List.
JA-456		JA > General Ledger Implemented Reference 2, 3 and 4 on Bank deposit list data set.

FREIGHT AND OPERATIONS

General

JF-1666		JF > Freight > Pickups New debtor setting implemented to bypass local zone cut off time validation.
JF-1626		JF > Freight > Analysis > Reports Performance report shows transit time in hours.
JF-1032	  	JF > Customers > Additional Charges > Search & Setup Additional Charges - handle commission based on "Apply To" setup.
JF-1041		JF > Process > Courier > Print/Email LDM Implemented LDM email content changes.
JF-1625		JF > Tools > Setup > System Setup Implemented change from days to hours in transit time setup table.

Jobs

JF-155 4		JF > Freight > Jobs Implemented standard subcontractor rating in jobs where subcontractors are non commission type.
JF-154 1		JF > Freight > Jobs Implemented new status codes for futile Pickup and delivery for better visibility.

Consignments

JF-139 1		JF > Freight > Consignments Implemented recharge of consignment and job to auto populate POD Details only from Parent.
JF-171 8		JF > Freight > Consignments Fixed an issue where totals in Manifest > Consignment grid were showing also those from unit flagged as No Show.
JF-135 8		JF > Freight > Consignments Added 'Find' option on Unshipped Planning.
JF-149 9		JF > Freight > Consignments > Add/Edit/View Implemented new "Undo Delivery Complete" function within the PUP/DEL Attempts form for Consignment and Jobs.
JF-141 7		JF > Freight > Consignments > Add/Edit/View Implemented a check in consignments as result locked status consignments cannot be cancelled.
JF-131 9		JF > Freight > Consignments > Add/Edit/View Fixed an issue due to which auto apply additional charge was not getting applied when service was changed.
JF-164 8		JF > Freight > Consignments > Add/Edit/View Added log and exception handling to \$0 GST issue.
JF-167 5		JF > Freight > Consignments > Add/Edit/View Added Taken At field and the ability to delete temperature readings in License Plate window.
JF-166 0		JF > Freight > Consignments > S&L Implemented dynamic query building for Consignment Search and List.

Distribution

MEDI-303		JF > Distribution > Linehaul Manifests Added new setting to trigger manifest export for departed only manifests.
JF-1646		JF > Distribution > Linehaul Manifests > S&L Implemented trailer temperature set point fields for trailer loads.
JF-1661	  	JF > Distribution > Linehaul Manifests > S&L Apply new filtering menu on Manifest Search and List.
JF-1574		JF > Distribution > Despatch Implemented ability to print consignment labels from allocation screen.
JF-1629		JF > Distribution > Despatch Fixed grid conditional formatting not getting applied correctly in allocation screen and linehaul console.
JF-1820		JF > Distribution > Despatch > Allocations Set default to Yes on pickup confirmation prompt.
JF-1349		JF > Distribution > Despatch > Allocations Performance improvement in allocation screen.
JF-1559		JF > Distribution > Despatch > Allocations Add the ability to allocate all pre allocations for a fleet group or across all listed Fleet.
JF-1578		JF > Distribution > Reports Added new form printing for Emergency Breakdown Report.

MAPVIEW

JMV-22		MapView Performance improvement in Job loading in allocation screen.
JMV-25		MapView > MapView > MapView > Map Implemented profiles in Jaix Mapview.
JMV-27		MapView > MapView > MapView > Map Implemented Jobs filtering in Mapview as per fleet selection.

MOBILITY

General

MMB-462		Mobility JaixDriver & SmartSCAN support for Android 9 and 10.
---------	--	--

Jaix Driver App

MMB-582		Mobility > JaixDriver JaixDriver will now show Local Dropped to Depot allocation type Jobs.
MMB-483		Mobility > JaixDriver Implemented Product Reading entry for Jaix Driver.
MMB-465		Mobility > JaixDriver Implemented Ability to capture signature for pickups in Jaix Driver.

SmartSCAN

SmartSCAN (WMS)

MMB-468		Mobility > SmartSCAN (WMS) SmartSCAN - new ability to Select Handling Unit Type on Put Dockets.
MMB-475		Mobility > SmartSCAN (WMS) Implemented showing Product DG Code and Product Attribute in Smart Scan WMS.
MMB-519		Mobility > SmartSCAN (WMS) Added the ability to add separate Put and Pick Instructions to Product Records that display on SmartSCAN Devices when completing dockets.

SmartSCAN (Freight)

MMB-491	 	Mobility > SmartSCAN (Freight) Implemented License plate number for Detail Line Linking and Pallet number Entry in SmartScan.
---------	--	--

ONLINE

JPT-24 0		Portal System now shows Default Pick Unit or Default Measure by Default on the add product grid for Portal WMS Orders.
JPT-24 9		Portal Portal - New ability to Search T&T screen by Job 'Detail Line Reference'.
JPT-20 7		Portal Implemented Portal transit time validation from days to hours.

JPT-21 2		Portal Added product third party reference to SOH report in WMS Portal.
-------------	--	--

Operations

JWM-571		WMS > Operations > Activity Implemented new filter options for WMS Activity report.
JWM-503		WMS > Operations > Activity Docket Ratings Logs will now be available to view after an invoice process has been completed for all dockets going forward.
JWM-340	 	WMS > Operations > Activity > Putaway Enabled the ability to Quarantine Put Dockets without enabling auto quarantine for a Debtor.
JWM-133		WMS > Operations > Activity > Pick Save Handling Unit Type Selection Automatically on Put Dockets Allocations Screen.
JWM-570		WMS > Operations > Track > Movements Added the ability to view Movements for all Warehoused from Head Office Branch in the Track Movements Screen.

Process

JWM-653		WMS > Process > Generate Invoices Removed backup database prompt when running WMS Invoice Process.
MRP-173		WMS > Process > Reports Implemented part-picked product group fields in WMS charge Summary Report.
JWM-572		WMS > Process > Reports Changes to the WMS Customer Charges Summary Report to better show Consolidated Storage Charges.

JWS-271	WS > Inventory Implemented new form Costed job sheet in Jaix Workshop.
---------	---

ISSUE RESOLUTION

Accounts

JA-485	JA Resolved an issue in Accounts due which unallocation of transaction was not working.
JA-444	JA > Debtors > Main > Search & Setup > Information > View Transactions Running balance in debtors Unallocated Transactions View now shows unallocated amounts instead of debit amounts
JA-553	JA > Debtors > Main > Transactions / Receipts Fixed an issue in Debtor transaction front screen where it retained last transaction details after full allocation of a receipt to a Master account.
MRP-168	JA > Debtors > Invoices > Manage Resolved an issue in Jaix Accounts which was generating an exception when multiple invoices with PODs were emailed.
JA-540	JA > Debtors > Invoices > Manage Resolved an issue in Accounts due to which Freight/WMS invoices were not being emailed to CC email addresses.
JA-547	JA > Assets > Fleet > Co. Fleet Fixed an issue in Accounts due to which exception was being generated on changing asset finance details.
JF-1969	JA > Assets > Fleet > Co. Fleet > Fleet Setup Fixed an issue in Accounts where driver name was not loading correctly in asset details.

JA-481		JA > Tools > Setup > System Setup > Setup > Invoices Fixed issue where invoice item can have the same code.
--------	--	--

Freight

General

JF-1906		JF > Freight > Pickups > Add/Edit/View Fixed issue where print options were not all displayed when creating new pick up.
JF-1596		JF > Freight > Quick Quotes Fixed an issue in Quick quotes due to which comments were not getting copied over to consignments.
JF-1902		JF > Tools > Main > Form Manager Fixed an issue in rate proposals printing due to which weights were incorrectly printed.
JF-1583		JF > Tools > Main > Imaging Resolved an issue in Imaging due which scanning was failing for transship and split consignments.

Consignments

JF-1651		JF > Freight > Consignments > Add/Edit/View Fixed an issue in consignments which was causing forwarding revenue fields not getting updated when forwarders were changed.
GEN-245		JF > Freight > Consignments > Add/Edit/View Fixed an issue in Default Report Output where selecting Preview disabled Printer and Copies fields.

Distribution

JF-182 1		JF > Distribution > Linehaul Manifests > Add/Edit/View Fixed an issue where an exception was throwing when opening a Manifest with inactive trailers.
-------------	--	--

JF-192 5	JF > Distribution > Linehaul Manifests > Add/Edit/View Added validation to manifest fuel top ups entry to prevent 0 litres entry.
JF-191 8	JF > Distribution > Trailer Loads > Add/Edit/View Resolved an issue in trailer load where qty and pallet space were not updating correctly when consignments were added to trailer load.
JF-191 1	JF > Distribution > Trailer Loads > Add/Edit/View Resolved an issue in Trailer load where consignment grid changes were not saving.
JF-188 8	JF > Distribution > Trailer Loads > S&L Fixed exception when viewing manifest on Trailer Load S&L.
JF-100 3	JF > Distribution > Runsheets > Add/Edit/View Fixed issue where runsheet form view is being closed right away when hitting Esc key.
JF-185 8	JF > Distribution > ADMs > Add/Edit/View Fixed an issue in Freight ADMs which was generating an exception on completing paperwork return.
JF-194 8	JF > Distribution > LDMs > S&L Fixed issued where LDM records were not displayed on LDM Search and List
JF-187 7	JF > Distribution > Despatch > Allocations Fixed issue where Pending Arrival flag was unflagged on a profile after switching from allocations to despatch.
JF-165 9	JF > Distribution > Despatch > Allocations Fixed issue where Consignment was not removed from Allocation's unshipped grid when it is loaded to a departed Manifest.
JF-168 1	JF > Distribution > Despatch > Allocations Fixed issue on allocation where delivery is not listing properly on correct depatch date when switching allocation type.
JF-189 2	JF > Distribution > Despatch > Load Planning Fixed issue on planning pad where Linehaul Code, Destination Depot and Origin Depot can be cleared.

MapView

General

GEN-257		MapView > MapView > MapView > Admin Resolved an issue in Mapview due to which shared profile to a user was not being shown.
---------	--	--

Portal

General

JPT-244		Portal Fixed an issue in WMS portal due to which earlier entered product lines were disappearing.
---------	--	--

Mobility

SmartSCAN (WMS)

MMB-463		Mobility > SmartSCAN (WMS) Fixed an issue where consolidated pallets were unable to be put away using the SmartSCAN devices.
---------	--	---

Jaix Driver App

MMB-486		Mobility > JaixDriver Enhance syncing speed on Jaix Driver.
---------	--	--

EDI

General

MEDI-281		JF > Freight > Jobs Resolved an issue in EDI due to which EDI job exports were not working for local jobs.
----------	--	---

MEDI-262	JaixAdmin > System > Main > Branch List Fixed an issue in WMS due to which imported docket email was not getting formatted well.
MEDI-277	JaixAdmin > System > EDI > Profiles Fixed a consignment rating issue for EDI imported consignment with pickups.

WMS

Customers

JWM-625	WMS > Customers > Products Resolved issue whereby system would permit deleting a config set that is on an unsaved docket.
JWM-598	WMS > Customers > Rates > Find/Setup Fixed an error where referencing a new break rate in an existing break rate rate could cause an error when saving a rate schedule.

Operations

JWM-704	WMS > Operations > Activity This task ensures that Requires Service option toggles are linked correctly and only forcing validation on Service when turned on.
JWM-701	WMS > Operations > Activity Resolved an issue in WMS due to which chargeto and carriers were not saving correctly.
JWM-708	WMS > Operations > Activity > Putaway Fixed issue whereby the Serial field shows in the Stock Details Window grid, even when not enabled for a product. It will now only be in the grid if it is enabled.
JWM-603	WMS > Operations > Activity > Pick Resolved an issue in WMS where duplicate services were being displayed in pick dockets.
JWM-495	WMS > Operations > Stocktake Fixed an issue where products of different product codes would incorrectly validate as mixing products when swapping their locations on a stocktake.

MRP-141		WMS > Operations > Reports Resolved issue whereby SOH Detailed Report does not list Child LPNs for consolidated pallets.
---------	--	---

Process

JWM-631		WMS > Process > Reports Fixed an issue where Serial Numbers were not always showing on the CSV by License plate report.
---------	--	--

Workshop

Jobs

JWS-309		WS > Jobs > Jobs > AMP Fixed issue whereby Labour Cost \$ field does not refresh after new Labour Code & Employee selection.
---------	--	--

Jaix Admin - ACCESS, SECURITY AND AUTOMATION

EDI

MEDI-255		JaixAdmin > System > EDI > Profiles Implemented profile level email notifications for EDI profiles.
MEDI-289	 	JaixAdmin > System > EDI > Format Builder Linehaul fleet and manifest trailers number fields were added to consignment EDI export.
MEDI-266		JaixAdmin > System > EDI > Format Builder Jaix Docket EDI Export formats have new Advanced Grouping function which includes Docket Item Exchange References. Any unique Reference will be used when grouping/splitting Detail Lines during EDI Export.
MEDI-318		JaixAdmin > System > EDI > Format Builder Added the ability to set consignment and job as depot dropped from EDI import.
MEDI-326		JaixAdmin > System > EDI > Format Builder Added a third Quantity field within the EDI Export field list for Dockets. This Quantity field will display the converted Pick Put Unit Quantity, instead of using the Configuration Set Default EDI Out Unit.

JA-461		JA > Debtors Implemented Unpaid invoice function for debtors.
JA-469		JA > Payroll Accounts > Employees Implemented employee training and performance history search and list.
JA-442		JA > General Ledger Implemented access to journal entries from General Ledger Transactions Search & List.
JA-456		JA > General Ledger Implemented Reference 2, 3 and 4 on Bank deposit list data set.

FREIGHT AND OPERATIONS

General

JF-1666		JF > Freight > Pickups New debtor setting implemented to bypass local zone cut off time validation.
JF-1626		JF > Freight > Analysis > Reports Performance report shows transit time in hours.
JF-1032	  	JF > Customers > Additional Charges > Search & Setup Additional Charges - handle commission based on "Apply To" setup.
JF-1041		JF > Process > Courier > Print/Email LDM Implemented LDM email content changes.
JF-1625		JF > Tools > Setup > System Setup Implemented change from days to hours in transit time setup table.

Jobs

JF-155 4		JF > Freight > Jobs Implemented standard subcontractor rating in jobs where subcontractors are non commission type.
JF-154 1		JF > Freight > Jobs Implemented new status codes for futile Pickup and delivery for better visibility.

Consignments

JF-139 1		JF > Freight > Consignments Implemented recharge of consignment and job to auto populate POD Details only from Parent.
JF-171 8		JF > Freight > Consignments Fixed an issue where totals in Manifest > Consignment grid were showing also those from unit flagged as No Show.
JF-135 8		JF > Freight > Consignments Added 'Find' option on Unshipped Planning.
JF-149 9		JF > Freight > Consignments > Add/Edit/View Implemented new "Undo Delivery Complete" function within the PUP/DEL Attempts form for Consignment and Jobs.
JF-141 7		JF > Freight > Consignments > Add/Edit/View Implemented a check in consignments as result locked status consignments cannot be cancelled.
JF-131 9		JF > Freight > Consignments > Add/Edit/View Fixed an issue due to which auto apply additional charge was not getting applied when service was changed.
JF-164 8		JF > Freight > Consignments > Add/Edit/View Added log and exception handling to \$0 GST issue.
JF-167 5		JF > Freight > Consignments > Add/Edit/View Added Taken At field and the ability to delete temperature readings in License Plate window.
JF-166 0		JF > Freight > Consignments > S&L Implemented dynamic query building for Consignment Search and List.

Distribution

MEDI-303		JF > Distribution > Linehaul Manifests Added new setting to trigger manifest export for departed only manifests.
JF-1646		JF > Distribution > Linehaul Manifests > S&L Implemented trailer temperature set point fields for trailer loads.

JF-1661	  	JF > Distribution > Linehaul Manifests > S&L Apply new filtering menu on Manifest Search and List.
JF-1574		JF > Distribution > Despatch Implemented ability to print consignment labels from allocation screen.
JF-1629		JF > Distribution > Despatch Fixed grid conditional formatting not getting applied correctly in allocation screen and linehaul console.
JF-1820		JF > Distribution > Despatch > Allocations Set default to Yes on pickup confirmation prompt.
JF-1349		JF > Distribution > Despatch > Allocations Performance improvement in allocation screen.
JF-1559		JF > Distribution > Despatch > Allocations Add the ability to allocate all pre allocations for a fleet group or across all listed Fleet.
JF-1578		JF > Distribution > Reports Added new form printing for Emergency Breakdown Report.

MAPVIEW

JMV-22		MapView Performance improvement in Job loading in allocation screen.
JMV-25		MapView > MapView > MapView > Map Implemented profiles in Jaix Mapview.
JMV-27		MapView > MapView > MapView > Map Implemented Jobs filtering in Mapview as per fleet selection.

MOBILITY

General

MMB-462		Mobility JaixDriver & SmartSCAN support for Android 9 and 10.
---------	--	--

Jaix Driver App

MMB-582		Mobility > JaixDriver JaixDriver will now show Local Dropped to Depot allocation type Jobs.
MMB-483		Mobility > JaixDriver Implemented Product Reading entry for Jaix Driver.
MMB-465		Mobility > JaixDriver Implemented Ability to capture signature for pickups in Jaix Driver.

SmartSCAN

SmartSCAN (WMS)

MMB-468		Mobility > SmartSCAN (WMS) SmartSCAN - new ability to Select Handling Unit Type on Put Dockets.
MMB-475		Mobility > SmartSCAN (WMS) Implemented showing Product DG Code and Product Attribute in Smart Scan WMS.

MMB-519		Mobility > SmartSCAN (WMS) Added the ability to add separate Put and Pick Instructions to Product Records that display on SmartSCAN Devices when completing dockets.
---------	---	---

SmartSCAN (Freight)

MMB-491		Mobility > SmartSCAN (Freight) Implemented License plate number for Detail Line Linking and Pallet number Entry in SmartScan.
---------	---	--

ONLINE

JPT-24 0		Portal System now shows Default Pick Unit or Default Measure by Default on the add product grid for Portal WMS Orders.
JPT-24 9		Portal Portal - New ability to Search T&T screen by Job 'Detail Line Reference'.
JPT-20 7		Portal Implemented Portal transit time validation from days to hours.
JPT-21 2		Portal Added product third party reference to SOH report in WMS Portal.

Operations

JWM-571		WMS > Operations > Activity Implemented new filter options for WMS Activity report.
---------	--	--

JWM-503		WMS > Operations > Activity Docket Ratings Logs will now be available to view after an invoice process has been completed for all dockets going forward.
JWM-340	 	WMS > Operations > Activity > Putaway Enabled the ability to Quarantine Put Dockets without enabling auto quarantine for a Debtor.
JWM-133		WMS > Operations > Activity > Pick Save Handling Unit Type Selection Automatically on Put Dockets Allocations Screen.
JWM-570		WMS > Operations > Track > Movements Added the ability to view Movements for all Warehoused from Head Office Branch in the Track Movements Screen.

Process

JWM-653		WMS > Process > Generate Invoices Removed backup database prompt when running WMS Invoice Process.
MRP-173		WMS > Process > Reports Implemented part-picked product group fields in WMS charge Summary Report.
JWM-572		WMS > Process > Reports Changes to the WMS Customer Charges Summary Report to better show Consolidated Storage Charges.

JWS-271		WS > Inventory Implemented new form Costed job sheet in Jaix Workshop.
---------	--	---

ISSUE RESOLUTION

Accounts

JA-485	JA Resolved an issue in Accounts due which unallocation of transaction was not working.
JA-444	JA > Debtors > Main > Search & Setup > Information > View Transactions Running balance in debtors Unallocated Transactions View now shows unallocated amounts instead of debit amounts
JA-553	JA > Debtors > Main > Transactions / Receipts Fixed an issue in Debtor transaction front screen where it retained last transaction details after full allocation of a receipt to a Master account.
MRP-168	JA > Debtors > Invoices > Manage Resolved an issue in Jaix Accounts which was generating an exception when multiple invoices with PODs were emailed.
JA-540	JA > Debtors > Invoices > Manage Resolved an issue in Accounts due to which Freight/WMS invoices were not being emailed to CC email addresses.
JA-547	JA > Assets > Fleet > Co. Fleet Fixed an issue in Accounts due to which exception was being generated on changing asset finance details.
JF-1969	JA > Assets > Fleet > Co. Fleet > Fleet Setup Fixed an issue in Accounts where driver name was not loading correctly in asset details.
JA-481	JA > Tools > Setup > System Setup > Setup > Invoices Fixed issue where invoice item can have the same code.

Freight

General

JF-1906	JF > Freight > Pickups > Add/Edit/View Fixed issue where print options were not all displayed when creating new pick up.
JF-1596	JF > Freight > Quick Quotes Fixed an issue in Quick quotes due to which comments were not getting copied over to consignments.
JF-1902	JF > Tools > Main > Form Manager Fixed an issue in rate proposals printing due to which weights were incorrectly printed.
JF-1583	JF > Tools > Main > Imaging Resolved an issue in Imaging due which scanning was failing for transship and split consignments.

Consignments

JF-1651	JF > Freight > Consignments > Add/Edit/View Fixed an issue in consignments which was causing forwarding revenue fields not getting updated when forwarders were changed.
GEN-245	JF > Freight > Consignments > Add/Edit/View Fixed an issue in Default Report Output where selecting Preview disabled Printer and Copies fields.

Distribution

JF-182 1	JF > Distribution > Linehaul Manifests > Add/Edit/View Fixed an issue where an exception was throwing when opening a Manifest with inactive trailers.
JF-192 5	JF > Distribution > Linehaul Manifests > Add/Edit/View Added validation to manifest fuel top ups entry to prevent 0 litres entry.
JF-191 8	JF > Distribution > Trailer Loads > Add/Edit/View Resolved an issue in trailer load where qty and pallet space were not updating correctly when consignments were added to trailer load.

JF-191 1	JF > Distribution > Trailer Loads > Add/Edit/View Resolved an issue in Trailer load where consignment grid changes were not saving.
JF-188 8	JF > Distribution > Trailer Loads > S&L Fixed exception when viewing manifest on Trailer Load S&L.
JF-100 3	JF > Distribution > Runsheets > Add/Edit/View Fixed issue where runsheet form view is being closed right away when hitting Esc key.
JF-185 8	JF > Distribution > ADMs > Add/Edit/View Fixed an issue in Freight ADMs which was generating an exception on completing paperwork return.
JF-194 8	JF > Distribution > LDMs > S&L Fixed issued where LDM records were not displayed on LDM Search and List
JF-187 7	JF > Distribution > Despatch > Allocations Fixed issue where Pending Arrival flag was unflagged on a profile after switching from allocations to despatch.
JF-165 9	JF > Distribution > Despatch > Allocations Fixed issue where Consignment was not removed from Allocation's unshipped grid when it is loaded to a departed Manifest.
JF-168 1	JF > Distribution > Despatch > Allocations Fixed issue on allocation where delivery is not listing properly on correct depatch date when switching allocation type.
JF-189 2	JF > Distribution > Despatch > Load Planning Fixed issue on planning pad where Linehaul Code, Destination Depot and Origin Depot can be cleared.

EDI

General

MEDI-281		JF > Freight > Jobs Resolved an issue in EDI due to which EDI job exports were not working for local jobs.
MEDI-262		JaixAdmin > System > Main > Branch List Fixed an issue in WMS due to which imported docket email was not getting formatted well.
MEDI-277		JaixAdmin > System > EDI > Profiles Fixed a consignment rating issue for EDI imported consignment with pickups.

WMS

Customers

JWM-625		WMS > Customers > Products Resolved issue whereby system would permit deleting a config set that is on an unsaved docket.
JWM-598		WMS > Customers > Rates > Find/Setup Fixed an error where referencing a new break rate in an existing break rate rate could cause an error when saving a rate schedule.

Operations

JWM-704		WMS > Operations > Activity This task ensures that Requires Service option toggles are linked correctly and only forcing validation on Service when turned on.
---------	--	---

JWM-701		WMS > Operations > Activity Resolved an issue in WMS due to which chargeto and carriers were not saving correctly.
JWM-708		WMS > Operations > Activity > Putaway Fixed issue whereby the Serial field shows in the Stock Details Window grid, even when not enabled for a product. It will now only be in the grid if it is enabled.
JWM-603		WMS > Operations > Activity > Pick Resolved an issue in WMS where duplicate services were being displayed in pick dockets.
JWM-495		WMS > Operations > Stocktake Fixed an issue where products of different product codes would incorrectly validate as mixing products when swapping their locations on a stocktake.
MRP-141		WMS > Operations > Reports Resolved issue whereby SOH Detailed Report does not list Child LPNs for consolidated pallets.

Process

JWM-631		WMS > Process > Reports Fixed an issue where Serial Numbers were not always showing on the CSV by License plate report.
---------	--	--

Workshop

Jobs

JWS-309		WS > Jobs > Jobs > AMP Fixed issue whereby Labour Cost \$ field does not refresh after new Labour Code & Employee selection.
---------	--	--
