Symbol	Meaning
	Major or Special Interest Task
	Refer to attached set up and usage instructions
	High impact task

GEN-277		Global New function to allow users to save the file locally when viewing linked Attachments/Scans/POD's against JAIX records.
MDS-42		Global New ability to easily move images between folders within the Imaging module.
GEN-122		Global Disabled ability to Mouse Scroll on all combo boxes - System Wide.
MDS-44		Global Delete functions are now available for attachments.
JA-526		Global Changes made through Debtor, Vehicle & Subcontractor QUICK SETTINGS in JAIX Accounts are now audit logged.
JADM-52		JAIXAdmin > System > Users > User Roles Ability to control user access to sensitive information - added New User Role permission to toggle visibility for Driver and WS Labour sensitive detail fields. This restriction is for the Search & List Grid along with individual Driver/Labour Records.

MEDI-341	JAIXAdmin > System > Service > API Sites API Access Key validation added to allow EDI Exports without the use of Basic username and password authentication.
MEDI-374	JAIX Service Optimization of the EDI Manager when creating Account Contacts and performing EDI Imports. Isolated and moved the EDI Manager File Queue to EDI Profiles only.

ACCOUNTS

MDS-30	JA > Tools > Main > Imaging Added a popup notification to the "Scanned Documents" Consignment Status Event within Account Contacts to clarify the intended purpose of the functionality. Popup box is displayed to the user when the option is selected.
JA-569	JA > Tools > Main > Form Manager Following fields now populated in the StatementDataSet to show on the Freight invoice and Freight invoice detail forms printed/emailed from JAIXAccounts. <ul style="list-style-type: none"> ChargeReference (StatementDataSet>Consingments>ChargeReference) PalletSpace (StatementDataSet>Consingments>Consingments_ConsignmentDetails>PalletSpaces) Freight Product (StatementDataSet>Consingments>Consingments_ConsignmentDetails>Freight ProductGroup) Freight Product Group (StatementDataSet>Consingments>Consingments_ConsignmentDetails>Freight ProductGroup) Description (StatementDataSet>Consingments>Consingments_ConsignmentDetails>Description)

JA-546	  	<p>JA > General Ledger > Main > Transactions TPAR - further refinements to Subcontractor & Creditor Transactions.</p> <p>Refer associated task manual with original task JA-513 (updated with these changes)</p>
JF-161 6		<p>JA > Assets > Fleet > Co. Fleet Co.Fleet (Vehicle) Setup From - Performance Review and Optimisation.</p>
JA-646		<p>JA > Assets > Fleet Refinements to Loan Amortisation functionality.</p> <p>Refer associated task manual.</p>
JA-484		<p>JA > Creditors Added Workshop Enabled column to Creditors Search and List.</p>
MRP-58		<p>JA > Debtors > Invoices Freight Invoice Statements Data Set > Added following new fields:</p> <ul style="list-style-type: none"> • DeliveredDateTime (Deliveries.DeliveredDateTime) • DeliveryRequiredDateTime (Consignments.DeliveryRequiredDateTime) • CashSaleDate (Consignments.CashSaleDate)
JA-471		<p>JA > Debtors When using Debtor > Transactions > Receipts (TYPE1), the selected Date will hold until user closes the tab instead of reverting back to current date on save of the transaction.</p>

Global Accounts Freight Mobility WMS Workshop Issue Resolution

FREIGHT AND OPERATIONS

General

MDS-25		<p>JF > Tools > Main > Imaging JAIX Imaging module > full performance review and Optimisation. Significant performance improvements.</p>
JF-2134		<p>JF > Tools > Main > Form Manager Runsheets printing consignment instruction and pallet docket fields were added to consignment dataset.</p>

JF-1930	<p>JF > Tools > Main > Form Manager Runsheets form - Add / Populate Additional Fields within Data Set - ConsignmentDataSet, Data Member - Consignments</p> <ul style="list-style-type: none"> • DeliveryRequiredDateTime • PUP Arrived Date Time • PUP Completed Date Time • DEL Arrived Date Time • DEL Completed Date Time • Runsheet Address 2 (new field) • Runsheet Address 3 (new field) • Agent Name • Agent Address 1 • Agent Address 2 • Agent Address 3 • Agent Postcode • Agent Suburb • Agent State • Sender Address 1 • Sender Address 2 • Sender Address 3 • Sender Postcode • Receiver Address 1 • Receiver Address 2 • Receiver Address 3 • Receiver Postcode
JF-1931	<p>JF > Tools > Main > Form Manager New pallet 'DocketNumber' field has been populated in the ConsignmentDataSet to allow for use on printed Consignment Notes where required.</p>
MRP-200	<p>JF > Tools > Main > Form Manager Implemented trailer load set point temperatures for manifest dataset.</p>
JF-1987	<p>JF > Tools > Main > Form Manager Following fields now populated in ManifestDataSet > ConsignmentDetailsBarcodePackagesTable, so that they can be used on printed manifests (for LPN and barcoded packages information).</p> <ul style="list-style-type: none"> • Barcode • ConsignmentDetailLineID • DockLocation • ItemNumber • PalletNumber
JF-1959	<p>JF > Tools > Main > Form Manager ConsignmentReceiverRef and ConsignmentSenderRef fields have been added to the ConsignmentDetailLinesTable reporting dataset, so they can be used in the Load Plan form and reports.</p>

JF-2322		JF > Tools > Main > Form Manager Added TrailerNo fields to ConsignmentDetailLines dataset for Manifests, to show which trailer each detail line has been added to during load planning.
JF-1603		JF > Global Updated References to FreightSCAN to reflect the new product SmartSCAN.

Jobs

JF-1845		JF > Freight > Jobs > S&L Updates to Job and CN S&L to correctly represent columns for Manifests, LDM and Runsheets.
---------	--	---

Consignments

JF-1753		JF > Freight > Consignments > S&L JAIX Freight > Consignment Details Pop Up Window - any grid layout changes made by the user are now automatically saved for the user, and reflected next time they access the window.
JF-2269		JF > Freight > Consignments > S&L Implemented load date of trailer load in consignments Search & List.
JF-1828		JF > Freight > Consignments > S&L Following new fields have been added to the Consignment/Job Search & List Column Chooser based on the Linehaul Manifest that the Consignment was last added to: <ul style="list-style-type: none"> • Manifest Prime Mover • Manifest Primer Mover Registration Number • Manifest Driver 1 • Manifest Driver 2
JF-1882		JF > Freight > Consignments > S&L Consignment & Job S&L's reflect total Quantities excluding any units where Show=False has been set in the rate setup.
JF-1728		JF > Freight > Consignments > S&L Added new search filters on Consignment Search and List for Splits, Tranships and Recharges.
JF-2008		JF > Freight > Consignments > Add/Edit/View Consignment Agent Held 'Picking' Screen > Added 'Item Quantity' column.

JF-2126		JF > Freight > Consignments > Add/Edit/View Added Unit Name column to the Agent Held Picking Grid.
JF-1869		JF > Freight > Consignments Linehaul Split Consignments now consider and remove child Transhipments when cancelling.
JF-2284		JF > Freight > Consignments Increased the size of Scanning/POD window.
JF-2073	 	JF > Freight > Consignments When creating Consignments from within Head Office, the Branch will be set to Head Office even when the 'Create in Senders Branch' or 'Recharge to Logged in Branch' options are turned on. Refer associated task manual.
JF-2311		JF > Freight > Consignments Implemented consignment delivery required date fields in Pallet docket Search & List form.
JF-2248		JF > Freight > Consignments Implemented a new setting "Display Delivery Consignment On Del. Req. Date" to show timeslot deliveries on delivery required date. Refer associated task manual.
MEDI-325	 	JF > Freight > Consignments Enabled EDI Import of Consignment and Job Header and Detail Level License Plates. Refer associated task manual.
MEDI-41	  	JF > Freight > Consignments Created a new Account Contact EDI Export toggle to "Include Driver Attachments". When ticked any images the Driver took and attached to a Consignment will also be transferred for Export Method: Email. Refer associated task manual.
JF-2319	 	JF > Freight > Consignments Added a new system setup option to remove Consignment Branch restrictions. This will allow ANY branch to make changes as though they are the owner branch. Refer associated task manual - speak to Service Desk if you wish to potentially use this feature.

JF-2287	  	<p>JF > Freight > Consignments</p> <p>Add new feature that auto updates tranship consignment when its parent consignment is updated.</p> <p>Refer associated task manual.</p>
JF-2144		<p>JF > Freight > Consignments</p> <p>Add an option to set a consignment or job from Released for Invoicing to Validated status.</p>

Distribution

JF-1937		<p>JF > Distribution > Despatch > Allocations</p> <p>New setting JF > System Settings > Branches > Despatch Settings > "Auto-Create Delivery Splits for All Linehaul Splits"</p> <p>This enables automatic creation of delivery splits from Linehaul splits function regardless of Direct/Depot.</p>
JF-1939		<p>JF > Distribution > Despatch > Allocations</p> <p>Fixed issue where Parent CN is not displayed on receiving branch allocation screen when LH Split is on a departed manifest.</p>
JF-1938		<p>JF > Distribution > Despatch > Allocations</p> <p>Added LH Split column to Pending Arrivals screen of Allocations.</p> <p>Refer associated task manual.</p>
JF-2187		<p>JF > Distribution > Despatch > Allocations</p> <p>Added 'Receiver Ref' column on Allocations screen and populated it with the consignment's Receiver Ref.</p>
JF-1891		<p>JF > Distribution > Despatch</p> <p>Updated JAIX Freight Allocations to use new Central Device Service for Online/Offline/Break status for devices.</p>
JF-2124		<p>JF > Distribution > Despatch</p> <p>To improve the visibility and status of Linehaul split movements coming into the depot we have added following additional columns to the splits pop up window on Allocations screen:</p> <ul style="list-style-type: none"> • Depot Delivered • ETA
JF-2080		<p>JF > Distribution > Despatch</p> <p>Local Depot Operations Report > Updated with new logic for handling of Splits.</p>

JF-2068		<p>JF > Distribution > ADMs</p> <p>Three additional fields have been added to the printed ADM form data set. All three fields come from the parent Manifest Number (the linehaul Manifest) that the ADM was created from - not the ADM itself.</p> <ul style="list-style-type: none"> • OriginalManifestNumber - parent Manifest Number • OriginalManifestFromZoneCode - From Zone Code from the parent Manifest • OriginalManifestFromZoneDesc - From Zone Description from the parent Manifest
MMB-454		<p>JF > Distribution > Runsheets > Add/Edit/View</p> <p>Following on from MMB-343 (version 20.13) which added '<u>Validation Only Mode</u>' for Manifests and Trailer Loads, we have now also added this functionality for <u>Runsheets</u> as well.</p> <p>Refer associated task manual.</p>
JF-2264		<p>JF > Distribution > Trailer Loads</p> <p>Added validation on confirm trailer load to check if from/to zone matches origin/receiving depots.</p>
JF-1920		<p>JA > Assets > Fleet > Co. Fleet</p> <p>Added new Co. Fleet type called Load Receptacles Management of Loading Receptacle within Linehaul Network. Refer also tasks JF-1922 and JF-1926</p> <p>Refer associated task manual</p>
JF-1922		<p>JF > Distribution</p> <p>Load Planning > A new Linehaul Code Trailer Configuration has been provided to manage Trailer Loads as "Loading Receptacle" (cage, etc).</p> <p>Management of Loading Receptacle within Linehaul Network Refer also tasks JF-1920 and JF-1926</p> <p>Refer associated task manual</p>
JF-1926		<p>JF > Distribution > Despatch > Linehaul Console</p> <p>Added the new "Load Receptacle" Fleet type (refer JF-1920) throughout applicable load functions in JAIX Freight.</p> <ul style="list-style-type: none"> • Linehaul Console • Trailer Loads • Planning Pad • Manifests <p>Management of Loading Receptacle within Linehaul Network. Refer also tasks JF-1922 and JF-1926</p> <p>Refer associated task manual</p>

JF-1667		JF > Distribution Added Sender's Ref on Linehaul Console Column Chooser.
---------	--	---

Linehaul Manifests

JF-1683		JF > Distribution > Linehaul Manifests > Add/Edit/View The Confirm option on the Manifest screen (ribbon bar) when clicked previously would perform the confirm action without any prompt or further confirmation from the user. This means if clicked accidentally there was no way to cancel the operation. This task adds a new confirmation prompt to the user when the Confirm option is clicked.
JF-1463		JF > Distribution > Linehaul Manifests > Add/Edit/View Subcontractor Paperwork Returns - When Paperwork Return Date is populated on the Manifest, the system will now automatically show the Paperwork fields without needing to click on the PW Return Icon.
JF-2275		JF > Distribution > Linehaul Manifests > Add/Edit/View Implemented ability to edit fleet registration field in manifest form when carrier is subcontractor.
JF-1663		JF > Distribution > Linehaul Manifests > Add/Edit/View Further optimization of the Manifest form load functions to improve efficiency and load time. <u>Significant performance improvements.</u>
JF-2199		JF > Distribution > Linehaul Manifests > Add/Edit/View Allowed Driver Name and Phone fields to be editable for Confirmed Subcontractor/Multi/Tow Operator.
JF-1963		JF > Distribution > Linehaul Manifests > Add/Edit/View Allow change of Subcontractor on a Trailer Load Manifest up to the point of being Processed.
JF-1860		JF > Distribution > Linehaul Manifests Updated LDM Form to use new Centralized Calculation Logic for Commission.
JF-1914		JF > Distribution > Linehaul Manifests Manifest Fuel Top Ups - improved odometer value entry validation.
JF-2266		JF > Distribution > Linehaul Manifests Add new data mappings for MDR form printing.

Load Planning

JF-1883		JF > Distribution > Despatch > Load Planning Updated Load Planning Functions to correctly reflect quantities based on unit Charge & Show flags.
JF-2257		JF > Distribution > Despatch > Load Planning Toggling flags on Consignments grid of Trailer Load Planning Pad reflects much faster now.
JF-1915		JF > Distribution > Despatch > Load Planning Task allows users to save changes made to Consignment Grid (layouts, columns) similar to when customizing the actual TL grid (Size and position on planning pad). Changes are reflected to new TL created and existing ones.
JF-1885		JF > Distribution > Despatch > Load Planning Load Planning Unshipped S&L > Modified Transshipment Status to now refer to Parent CN Status.
JF-2256		JF > Distribution > Despatch > Load Planning Improved efficiency when loading multiple consignments on Trailer Load in the Load Planning screen
JF-1923		JF > Distribution > Despatch > Load Planning Improve auto refresh of Unshipped Consignments S&L.
JF-2260		JF > Distribution > Despatch > Load Planning Added logs for additional LHC related operations.

Linehaul Console

JF-1729		JF > Distribution > Despatch > Linehaul Console Updating Manifest ETA now possible on Manifest S&L and via right click menu in Linehaul Console.
JF-1679		JF > Distribution > Despatch > Linehaul Console New ability to allow for quad combinations in Linehaul Console.
JF-2270		JF > Distribution > Despatch > Linehaul Console Implemented logging for data event and file purge process in Linehaul console.

Global Accounts Freight Mobility WMS Workshop Issue Resolution

MAPVIEW

JMV-26		MapView > MapView > MapView > Map Fleet and Marker Icons have been improved for better visibility in Mapview.
--------	---	--

MOBILITY Apps

General

MMB-418	 	JAIXAdmin > Mobility Services > Vlink Service > Settings Added ability to present notifications to driver upon login based on any setup driver Requirements that are close to expiring. Refer associated task manual.
---------	--	---

JAIXDriver App

MMB-528		Mobility > JAIXDriver The colour scheme for JAIXDriver has changed to reduce font contrasting on navigation bars, spacers and button borders.
MMB-646		Mobility > JAIXDriver Removed Workshop Issue popup and Report Issue function when 'Exclude From Workshop' is on.
MMB-361	 	Mobility > JAIXDriver JAIXDriver app performance improvements.
MMB-428		Mobility > JAIXDriver JAIXDriver - When selecting an allocated Pickup/Delivery/Job, app now displays the 'Charge To' Account Name.
MMB-467		Implemented consignment scan (Consignment Note Detail Search) functionality. Refer associated task manual.
MMB-588		Mobility > JAIXDriver JAIXDriver - Added logging to capture over the air time for long running API requests.

SmartSCAN WMS

MMB-543		<p>Mobility > SmartSCAN WMS</p> <p>Updated WMS Smart Scan to prompt for a Serial on Put if one doesn't exist, where required.</p> <p>Refer associated task manual.</p>
MMB-527		<p>Mobility > SmartSCAN WMS</p> <p>The SmartSCAN splash screen has been updated.</p>

SmartSCAN Freight

MMB-535		<p>Mobility > SmartSCAN Freight</p> <p>When a SmartSCAN user scans a barcode and the prefix matches a FreightScan EDI Format, the system will attempt to read the barcode using the EDI Format Field Lengths and Bindings. If no match can be made, it will fall back to scanning at Record (Consignment) level.</p>
MMB-642		<p>Mobility > SmartSCAN Freight</p> <p>Verified the new toggle option on Admin->SmartSCAN Settings that allows you to enable/disable Consecutive CN Scanning.</p>
MMB-587		<p>Mobility > SmartSCAN Freight</p> <p>SmartSCAN - Added new logging to capture over the air time for long running API requests.</p>
MMB-577		<p>Mobility > SmartSCAN Freight</p> <p>Added new logging to assist troubleshooting failed EDI responses.</p>
MMB-455	 	<p>Mobility > SmartSCAN Freight</p> <p>Added Container Load functionality to SmartSCAN Freight.</p>

[Global](#)
[Accounts](#)
[Freight](#)
[Mobility](#)
[WMS](#)
[Workshop](#)
[Issue Resolution](#)

General

JWM-640		<p>WMS > Warehouse > Storage</p> <p>New 'Quick Settings' functionality to allow bulk update of Location Setup.</p> <p>Refer associated task manual.</p>
JWM-685		<p>WMS</p> <p>Implemented the ability to capture Serial Numbers on SmartSCAN Devices as part of the putaway process.</p> <p>Refer associated task manual.</p>

Operations

JWM-652		<p>WMS > Operations > Activity > Pick</p> <p>Added new option on Warehouse where user can set the Docket Invoice Number to the CN Receiver Reference.</p>
JWM-716		<p>WMS > Operations > Activity > Pick</p> <p>Added additional performance logging to WMS Pick Allocations to assist with troubleshooting intermittent slow system response on allocation.</p>
JWM-669		<p>WMS > Operations > Activity</p> <p>There are occasions where two dockets can be created with the same number at the same time. Previously, the user who saves the docket first would be able to successfully save, and the other user was forced to close the docket, possibly losing a lot of data entry.</p> <p>Now, instead of forcing the second user to close the docket, we detect and automatically use the next available docket number.</p>
JWM-663		<p>WMS > Operations > Activity</p> <p>Added ability to restore a previously cancelled Pick or Put Docket. When a Cancelled Pick or Put Docket is opened, there is now a 'Restore' Icon on the tool bar that can be invoked, to reinstate the record.</p>

JWS-268		WS > Assets > Assets > Co. Fleet Removed the Odo Restriction of 3 instances and added a flag to specify physical replacement of Odos.
JWS-383		WS > Assets > Assets > Co. Fleet Option to Exclude Company fleet from Workshop. Refer associated task manual
JWS-329		WS > Jobs > Services > All Services Due Added Associated Asset ID to Column Chooser on All Services Due Screen.
JWS-355		WS > Jobs > Jobs > AMP We recently added a Radio Button Control to the AMP to offer more flexibility in logging of readings against assets. It has been determined that having this set to Actual Finish date by default will offer more accurate recording of readings. This has now been implemented.
JWS-315		WS > Jobs > Jobs > AMP Added a column to Service Checklist tab on the AMP to denote Checklist items that are added from the Service Template and added validation to disallow delete / edit of these items. (Applies to new Jobs only. Existing jobs will be excluded).

Global Accounts Freight Mobility WMS Workshop Issue Resolution

ISSUE RESOLUTION

Global

GEN-275	Global Resolved an update issue in Search and List screens when datasource is refreshed while rows were highlighted.
JS-57	JAIX Service Resolved an issue in consignment causing an exception while rating consignments which don't exist in database.

Accounts

JA-64 1	JA > Assets > Fleet > Co. Fleet Prompt to reactivate upon closing a sold vehicle is removed, as well as the 'Sell' button.
JA-64 7	JA > Assets > Fleet > Co. Fleet > Admin > Associations Fixed an issue where adding and saving Insurance details to a fleet was deleting its Associated P&E Asset ID.
JA-65 5	JA > Creditors > Purchase Orders > Search & Setup Fixed an issue where Purchase Order totals were not correctly calculating decimal places.
JA-63 3	JA > Debtors > Invoices > Manage Resolved an email notification issue in Accounts when multiple invoices were selected.
JA-65 4	JA > Debtors > Invoices > Manage Resolved an Exception that occurs when using Charge To Copy Scans print/export option.
JA-53 2	JA > Debtors > Invoices > Manage Fixed issue with Freight Invoices whereby Freight units marked as show = 'False' would not appear. The 'show' flag is not intended to be considered on Freight invoices.
JA-60 6	JA > Debtors > Invoices > Manage Fixed an issue in reprinting invoices where debtor defaults for PDF/CSV were not being followed.
JA-62 6	JA > Debtors > Invoices > Manage Fixed an exception when printing multiple invoices using Debtor Defaults.
JA-58 3	JA > Debtors > Main > Search & Setup > Debtor > Master Details Resolved issue whereby user was unable to remove Master Account selection in a child debtor account.
JA-62 2	JA > Debtors > Main > Search & Setup > Online Access > Online Logins Resolved issue where an online login with saved user layout throws an exception trying to delete.
JA-52 3	JA > Debtors > Reports Fixed an issue in Account Listing report where an exception was being thrown when the Address Type selected was Postal Address.
JA-65 6	JA > General Ledger > EOY > Process Force to ignore the Transaction Days Back/Forward for GL EOY process.

JA-56 7	JA > General Ledger > Main > View Journals Resolved an issue whereby reversal of a "Finance Journal" would cause an exception.
JA-64 3	JA > General Ledger > Reconciliation > Reconcile Increased the number of characters that can be displayed in Current Balance field.
JA-63 1	JA > Subcontractors > Main > Transactions / Payments Fixed an issue where an exception was being thrown when creating a Subcontractor Transaction type 3 because Reference 2 field exceeded maximum length.

Freight

Customers

JF-2206	JF > Customers > Customer Rates Fixed an issue where adding a Group/Unit was creating a duplicate on Lanes tab.
JF-1899	JF > Customers > Customer Rates > Search & Setup Fixed an issue in Rate Proposal where lane breaks were not reflecting immediately on Lanes tab unless saved first.
JF-2194	JF > Customers > Customer Rates > Search & Setup > Lanes Removed sorting in Weight and Unit breaks and fixed filtering in Unit breaks to add break prices on filtered results.
JF-2211	JF > Customers > Schedule Rates Fixed a 'Memory Leak' exception when opening a large Rate Proposal.
JF-2198	JF > Customers > Senders & Receivers Resolved an issue in Sender Receiver which was causing sender receiver to be locked out for user belonging to View only role.

Distribution

JF-2227	JF > Distribution Resolved an issue for printing pallet docket info correctly for consignment having split/tranships.
JF-2297	JF > Distribution Resolved a scrolling issue in trailer load and manifest form.

JF-2119	JF > Distribution Resolve issue where prime mover and dolly relocation does not reflect immediately on LHC - Resources Grid.
JF-2232	JF > Distribution Fixed an issue where a trailer load with the parent consignment cannot be confirmed when a split and transshipment was created from it.
JF-2174	JF > Distribution > ADMs > Add/Edit/View Resolved an issue in ADM which prevented ADM creation for local subcontractor.
JF-2123	JF > Distribution > Despatch Resolved issue when auto created deliveries does not get the pre allocation fleet of the parent consignment.
JF-2121	JF > Distribution > Despatch Resolved issue in Allocations > Pending Arrivals View whereby Consignments split for LH were including quantities that are direct delivered.
JF-1815	JF > Distribution > Despatch > Allocations When a Fleet Runsheet is completed or cancelled and user allocates CN/PU/Job to it, the system now creates a new one instead of using the completed or cancelled Runsheet.
JF-2186	JF > Distribution > Despatch > Allocations Un-manifested transhipped consignments are now NOT showing as pending arrivals in Destination branch.
JF-2330	JF > Distribution > Despatch > Allocations Resolved issue whereby the Allocations Despatch view was incorrectly populating Created Time field with the date instead.
JF-2133	JF > Distribution > Despatch > Allocations Resolved issue whereby manually un-allocating XDock delivery job legs would not send a push notification data event to the device.
JF-2184	JF > Distribution > Despatch > Allocations Resolved issue where final Manifest is not being displayed on LH Split view on receiving branch.
JF-2179	JF > Distribution > Despatch > Allocations Resolved issue where cancelled splits are displayed on LH Split window on allocation screen.
JF-2205	JF > Distribution > Despatch > Allocations Resolved issue where PU can be created on Unshipped Planning when it is already booked for delivery.

JF-2190	JF > Distribution > Despatch > Allocations Resolved issue where LH Split qty and Pending Arrival qty are not displayed correctly on receiving branch's allocation screen.
JF-2161	JF > Distribution > Despatch > Allocations Resolved incorrect delivery status code displaying in allocation screen for linehaul split consignments.
JF-2268	JF > Distribution > Despatch > Allocations Resolved an issue of listing transship consignment incorrectly in allocations unshipped consignment grid.
JF-2234	JF > Distribution > Despatch > Allocations Resolved an issue of depot delivered consignments not showing up in pending arrival in allocation screen.
JF-2243	JF > Distribution > Despatch > Allocations Resolved an issue in allocations where deliveries arrived from linehaul console not appearing as per delivery required date.
JF-2233	JF > Distribution > Despatch > Allocations Resolved an issue in allocation screen which was causing exception when changing fleet.
JF-2283	JF > Distribution > Despatch > Allocations Resolved an issue about Consignments showing on "Pending Arrivals" view with zero quantity after Split CN was arrived.
JF-2189	JF > Distribution > Despatch > Allocations Resolve issue where details from a LH split with tranship is not displaying the correct details for each split on receiving branch's allocation screen.
JF-2223	JF > Distribution > Despatch > Allocations Fixed an issue where transhipped consignments set to Direct Delivered were incorrectly showing in destination branch' Pending Arrivals.
JF-2087	JF > Distribution > Despatch > Allocations Fixed an issue where the XDock button on Allocations screen was not working.
JF-1950	JF > Distribution > Despatch > Allocations Fixed an issue where split consignment's booking references were still displaying on Unshipped Consignments grid even after being cancelled.
JF-2191	JF > Distribution > Despatch > Allocations Fixed an issue where Pending Arrivals View on Allocations Screen was still showing arrived deliveries that had been rebooked.

JF-1945	JF > Distribution > Despatch > Allocations Fixed an issue where Allocations was not displaying the updated Pallet Space of the linked PUP when it has been updated on the consignment.
JF-1951	JF > Distribution > Despatch > Allocations Fixed an issue in Unshipped Consignments grid where values of parent consignment was not updating to original values when its split consignment was cancelled.
JF-2235	JF > Distribution > Despatch > Allocations Depot Local Operations Report is now displaying the last manifest and trailer load details of the consignment.
JF-2224	JF > Distribution > Despatch > Allocations Consignment completion details are not reverting correctly after-unarriving the manifest.
JF-1944	JF > Distribution > Despatch > Linehaul Console When confirming a trailer load in LHC, the validate destinations window shows to create tranships where required. This task resolves an issue with this window whereby the user could only use the 'Select All' or 'Select None' along the top of the validate destinations window before proceeding with 'Create Tranships' (Individual CNs could not be selected).
JF-2282	JF > Distribution > Despatch > Linehaul Console Trailer load with LH Code config = None can now be confirmed even without assigning a trailer.
JF-2279	JF > Distribution > Despatch > Linehaul Console Resolved issues for tranship consignment with split when auto creating deliveries and showing on pending arrival view.
JF-2251	JF > Distribution > Despatch > Linehaul Console Resolved issue where updates outside console should reflect each user LMZ.
JF-2250	JF > Distribution > Despatch > Linehaul Console Resolved issue where recently arrived manifest not shown on console grid when default profile has 'Arrived Today' option selected.
JF-2229	JF > Distribution > Despatch > Linehaul Console Resolved issue where prime mover's Rego and Contact number was not populating on manifest form when prime mover was dragged and drop on LHC.
JF-2239	JF > Distribution > Despatch > Linehaul Console Resolved issue where delivery split were created for both tranship and tranship split by just arriving main tranship consignment.
JF-2292	JF > Distribution > Despatch > Linehaul Console Resolved issue where a manifest that was not departed can be arrived.

JF-2237	JF > Distribution > Despatch > Linehaul Console Resolved issue on undo tranship not triggered when the parent consignments were change from depot to direct.
JF-2158	JF > Distribution > Despatch > Linehaul Console Resolved an issue in Linehaul console due to which company fleet could be used with subcontractor trailer load.
JF-2160	JF > Distribution > Despatch > Linehaul Console Resolved an issue due to which manifest could not be created in LHC because trailer load got no trailer.
JF-2265	JF > Distribution > Despatch > Linehaul Console Resolve exception thrown randomly when closing LHC.
JF-2267	JF > Distribution > Despatch > Linehaul Console Resolve exception displayed on LHC.
