Patch Summary

CRITICAL UPDATE NOTES

SMARTSCAN (Freight + WMS)
Version 22.21.0 and beyond is not backwards compatible with prior versions of SmartSCAN. Update to or past the 22.21.0 version requires update of the SmartSCAN application to the relevant matching version.

GLOBAL

GEN-459		**Global** Implemented a new authentication process using Azure Active Directory, allowing users to sign into the applications using their Windows username and password. Please refer task manual and contact the Service Desk if you are interested in setting this up for your environment Refer associated documentation
GEN-497		**Global** Any form within the ERP can now be undocked and moved across screens
GEN-498		**Global** Jaix Attachments Form will now correctly support Copy/Paste functions (including Ctrl-C, Ctrl-V)
GEN-499		**Global** New feature of Jaix Report Preview Form to Export certain formats to Clipboard. This can allow quick and easy paste to desktop rather than navigate through shared locations
GEN-467		**Global** Updated the Desktop login forms so that they can be dragged around the screen
GEN-469		**Global** Updated the Desktop login forms with new backgrounds and layout
MEDI-526		**EDI** Added Freight Product Group and Freight Product Name to the Consignment EDI Export Mappers

Multi		**Global** Due to updates in the system architecture, the current "Close without Saving" prompts within the ERP are needing to be changed. Where unsaved changes exist, the prompt will advise the user of this and provide them the option to Discard the changes, or to Cancel the exit allowing them to manually Save.  These prompts will be updated to this new format only when the relevant form/area has been updated to the new system architecture. Unfortunately this will mean some inconsistency as we work through updating the ERP however the new prompt will eventually replace the existing in all areas.

ADMIN

MEDI-464		**JaixAdmin - System - EDI** Dropped to Depot/PUP From Depot flags will now set based on the matching Sender/Receiver record if not populated within the EDI Import format mapping
MEDI-413		**JaixAdmin - System - EDI - Format Builder** New Consignment Status "With Forwarding Carrier" now supported within the Consignment 'Update' format type within EDI. Please refer the task manual as well as JF-2706 within the Freight release notes for more information Refer associated documentation
MEDI-449		**JaixAdmin - System - EDI - Format Builder** Pick Up From Depot field added to Consignment Import Mappers
GEN-385		**JaixAdmin - System - Main - Entity List** Cleaned up Entity Mobility Setup and Remove Obsolete Settings
JADM-126		**JaixAdmin - System - Service - Email Queue** Added the ability to Resend and Forward emails from the Email Queue

		Refer associated documentation
JADM-119		**JaixAdmin - System - Users - User Roles** A new User Role permission added to control access to the Jaix Freight Customer Analysis functions

Global Accounts Freight WMS Mobility Web Portal Issue Resolution v22.21.0 Task Manuals
Patch Summary

ACCOUNTS

GEN-452		**JA** JAIX Asset Management System (JAMS) is a project under development to assist with asset management across multiple entities within the JAIX ERP. Essentially it allows for an Asset master entity to manage Asset details which are then updated in shared entities to avoid duplicate entry and updates. Whilst this functionality is not yet ready for wider release, some fields & columns relating to the project will be visible within Asset related areas. This will have no impact on your current processes. Please refer the task manual for more information Refer associated documentation
JA-892		**JA - Assets** Department and Cost Centre columns have been added to Co. Fleet and P&E Search & List Column Chooser
JA-766		**JA - Creditors - Auto Pay** Allocated adjustment transactions will now display for Creditor and Subcontractor Auto Pay
JA-744		**JA - Creditors - Reports** The 'Held' flag has been added to the Creditor and Subcontractor Transaction Listing dataset
JA-756		**JA - General Ledger - Main - View Account** Transactions grid column width changes will now be saved
JA-776		**JA - General Ledger - Setup - Chart of Accounts** Updated GST Type to display full code and description

Global Accounts Freight WMS Mobility Web Portal Issue Resolution v22.21.0 Task Manuals
Patch Summary

FREIGHT AND OPERATIONS

General

JF-3348		**JF - Depots and Zones - Locations - S&L** Updated Location Search and List to prioritise showing a location under it's Main Zone, not Local Zone
JF-2636		**JF - Freight - Pickups - Add/Edit/View** Naked Pickups for multiple Consignment destinations will now not create as Local Cross Dock when the first Destination Zone is local
JF-1620		**JF - Process - Process - Manifest Preview** The Manifest Process wizard will now provide more user friendly information as to the cause of process errors
JF-2848		**JF - Process - Process - Manifest Run** Improved Consignment "Release for Invoice" function to incorporate pricing validation
JF-1495		**JF - Process - Reports** Added Forwarding Cost to the Consignment Freight Forward Revenue Journal
JF-3231		**JF - Sender/Receivers** Removed obsolete Geofence fields
MRP-189		**JF - Tools - Main - Form Manager** Hidden Units (Show = False) will no longer be Included within Label Quantity values
MRP-250		**JF - Tools - Main - Form Manager** Trailer 2 Unit Number has been added to Manifest Form Data Set
JF-3359		**JF - Tools - Setup - System Setup** "Allow Rated Price Edit on Transhipped CN's" has been renamed to "Allow Edit of Original Consignment After Transhipment"
JF-3379		**JF - Tools - Setup - System Setup** Added a new setting within Linehaul Console settings to disable system confirmation ("Are you sure….?") prompts within the Linehaul Console

Consignments

JF-1968		**JF - Consignments** A new Debtor Contact setting has been added for "Cancel Notifications" which allows Debtor contacts to be notified should a Consignment be cancelled, including the user comment entered at the time of cancellation. Refer associated documentation
JF-2715		**JF - Freight - Consignments - Add/Edit/View** Provided visibility and a hyperlink with the Rate Logs to access the relevant Rate Proposal used for rating Refer associated documentation
JF-1685		**JF - Freight - Consignments - S&L** Sender Address Details Added to Consignment Search & List Column Chooser
JF-2693 Patch .2		**JF - Pickups / Consignments (1-2-1)** Commenced updates to the 1-2-1 Pickup/Consignment structure to start bringing this structure in line with other scenario's including allowing load planning prior to Pickup completion. Leading towards the ability to have the Consignment unlocked for a 1-2-1 record.

Distribution

JF-2745		**JF - Distribution - Despatch** Parent Consignment Pre/On Forwarder and Subcontractors will now populate through to Transhipment Consignments
JF-2706		**JF - Distribution - Despatch - Allocations** Allocation of deliveries for Intra-state zones to a Subcontractor Fleet will now update the Consignment to a new status code "With Forwarding Carrier (48)", improving customer visibility of delivery forwarding within Portal. This status can also be updated via EDI Consignment 'Update' format mapping. Refer MEDI-413 within the EDI release notes.
JF-2874		**JF - Distribution - Despatch - Allocations** Receiver will now always be populated on a single Consignment PUP when created from Unshipped Consignments
JF-2490		**JF - Distribution - Despatch - Allocations** Show options have been expanded to include a 'Pickup From Depot' option which provides visibility of Consignments awaiting customer pickup from the depot on the Despatch screen. This is combined with a new Right Click > Picked Up From Depot option so that these can be completed directly from the Despatch screen without allocation to a Fleet. Please refer the task manual for more information

		Refer associated documentation
JF-3220		**JF - Distribution - Despatch - Allocations** The ability to automatically optimise a Fleets route has been added to the Despatch screen. This function uses integration with HERE Maps to pass through all Pickup and Delivery information for the selected Runsheet(s) and receive back the optimal route order which is then updated within the Runsheet. Additional costs apply for this feature. Please refer the task manual and contact the Service Desk or your Account Manager for more information. Refer associated documentation
JF-2518		**JF - Distribution - Despatch - Allocations** The Order value has been added to the Fleet Summary/Runsheet Summary allowing these areas to be sorted in this manner
JF-3206		**JF - Distribution - Despatch - Allocations** Total Qty and CN Count columns added to the Runsheets grid. Print and Complete functions added to the Right-Click menu
JF-2671		**JF - Distribution - Linehaul - Linehaul Console** The prompt preventing departure due to un-arrived Consignments will now include the relevant Manifest numbers that are pending arrival.
JF-2704		**JF - Distribution - Linehaul Manifests - Add/Edit/View** Comments can now be amended even after the Manifest has been processed
JF-2667		**JF - Distribution - Reports** The Load Report trailer fields now support Trailer Loads
JF-3793 Patch .2		**JF - Distribution - Despatch - Allocations** SmartSCAN warnings when allocating un-scanned Freight are now disabled by default. These can now be enabled via System Setup > Branches > Despatch Settings: "Enable Not Scanned Into Depot Warning"
JF-3790 Patch .2		**JF - Distribution - Linehaul - Unshipped Planning** Added Sender Suburb and State into the Unshipped Planning S&L Column Chooser

Global Accounts Freight WMS Mobility Web Portal Issue Resolution v22.21.0 Task Manuals Patch Summary

WMS

General

JW M-842		**WMS** A new Stock Engine has been built from the ground up providing extremely improved performance and more flexibility for further functionality and development going into the future. Apart from small enhancements, no other impact/change should be experienced from the User Interface perspective - the changes are almost exclusively back end. Please refer linked task manual for some changes you can expect though.
JW M-966		**WMS - Operations** Added the Charge Freight To, Service Code and Carrier fields to the Docket Audit Logging
JW M-1316		**WMS - Operations - Activity** WMS Dockets will now be rated using the active rate schedule that the Docket Confirm date falls within, rather than the movement date. This means that dockets created with a movement date before a new rate schedule was activated, but confirmed after would now be rated using the new Rate schedule, rather than the old one.
JW M-1528		**WMS** Removed the auto-refresh feature from the WMS Docket and Product Search and List grids when exiting out of an opened record. Manual refresh will be required to refresh the grid, as per the standard for Search and List grids across the ERP.

Global Accounts Freight WMS Mobility Web Portal Issue Resolution v22.21.0 Task Manuals
Patch Summary

CRITICAL UPDATE NOTES

SMARTSCAN (Freight + WMS)
Version 22.21.0 and beyond is not backwards compatible with prior versions of SmartSCAN. Update to or past the 22.21.0 version requires update of the SmartSCAN application to the relevant matching version.

JAIXDriver App

MMB-857		**Mobility - JaixDriver** Include 'Description' for Freight Summary detail lines in Jaix Driver when a Freight Product Group is selected
MMB-788		**Mobility - JaixDriver** Prompt for Odometer Readings can now be enabled separately for Local and Linehaul Fleet from the Jaix Driver settings under Jaix Admin > Entity List > Mobility
MMB-609		**Mobility - JaixDriver** This release see's the first iteration of Linehaul functionality implemented to our Jaix Driver App! Linehaul drivers can login to view upcoming Manifests, commence their trips and perform Linehaul Pickups and Deliveries with sign on glass the same as Local drivers. It is important to note that this functionality is only available to our clients using Trailer Loads. Please refer the task manual for more information and contact your Account Manager or Service Desk to get this up and running! Refer associated documentation

SmartSCAN (Freight)

MMB-923		**Mobility - SmartSCAN (Freight)** A new setting has been added to JAIX Admin Entity settings for SmartSCAN to turn off Transhipment warnings when the Consignment is direct drop

SmartSCAN (WMS)

MMB-8		**Mobility - SmartSCAN (WMS)** SmartSCAN WMS users can now add additional Service Charges to Dockets from their device! Please refer the task manual for more information on setup and functionality. Refer associated documentation

Global Accounts Freight WMS Mobility Web Portal Issue Resolution v22.21.0 Task Manuals Patch Summary

General

JPT-420		**Portal** A new setting has been added in Debtors > Online Settings to force entry of a Delivery Required Date when creating Pickups, Consignments and Quotes.
JA-938		**Portal** A new method of managing Customer Sender/Receivers is now available for Portal, enabled via the Jaix Admin > System Setup > Online > "Global Linked Sender/Receivers (Frequent Addresses)" setting. When using this method you can allow customers access to specific Sender/Receivers from your own global list, rather than having them maintain their own. Customers will not be able to add new frequent addresses to their own lists. This is a very high impact setting and we strongly recommend discussing any changes here with your Account Manager prior to understand the full impact
JA-936		**Portal** A new setting has been added in Debtors > Online Settings to "Hide Internal Attachments". Selecting this for a Debtor will prevent them from viewing any Consignment attachments that were not added by the Debtor themselves via Portal.

Global Accounts Freight WMS Mobility Web Portal Issue Resolution v22.21.0 Task Manuals Patch Summary

ISSUE RESOLUTION

Global

MEDI-477	**JaixAdmin - System - EDI - Format Builder** Exception Error when importing an xml format back into Jaix Admin
JADM-131	**JaixAdmin - System - Main - Entity List** Entity List incorrectly prompts to save even though changes haven't been made
JADM-86	**JaixAdmin - System - Users - User Roles** Resolved some issues with the User Role permission for 'Customer Rates'
JAD-185	**JaixAdmin - Task Schedules** Date is changed to year 9999 on a scheduled which causes an Exception in Task Scheduler.

EDI

MEDI-476	**EDI** Depot-Level Manifest Exports are still triggering when all Consignments Are Direct Drop
MEDI-510	**EDI** Null reference exception on creating EDI response when the post code is null
MEDI-649 Patch .2	**EDI** Subcontractor Manifest EDI Not Triggering When All Consignments Are Direct Drop
MEDI-402 Patch .2	**EDI** EDI Mathematical Command Strings Setting XML Tags to Uppercase and Not Setting DataType Correctly

Accounts

JA-862	**JA - Assets - Fleet - Co. Fleet - Fleet - Requirements** Creating New CoFleet and Setting Registration Due Date Before Initial Save Does Not Update Expiry Date

JA-850	**JA - Assets - Fleet - Co. Fleet - Fleet - Requirements** Resolved issues with Requirement due dates not updating correctly for existing Co.Fleet when updated via compliance settings
JA-738	**JA - Creditors - Purchase Orders - Search & Setup** Details incorrectly copying to new PO form on PO Form Close
JA-742	**JA - Debtors - Invoices - Manage** GST Rounding in WMS invoice
JA-948	**JA - General Ledger - Main** The Balance column within the GL Search and List function is not reporting correctly when printing
JA-755	**JA - General Ledger - Main - Transactions** General Ledger Transaction S&L - Sort/Group by 'Cost Centre' is not Working
JA-544	**JA - General Ledger - Main - Transactions** Tidy up within Journal Templates
JA-720	**JA - General Ledger - Reconciliation - Bank Feeds** Bank Import Null Date Range Exception
JA-839	**JA - General Ledger - Reconciliation - Bank Feeds** Unreconciled Account Listing Report Blank for the Bank Import Function
JA-848	**JA - Tools - Setup - System Setup - Main - General** Transactions Not Respecting Default Department Selected against Cost Centre

Freight

General

Consignments, Jobs, Pickups, Depots & Zones, Quick Quotes

JF-3281	**JF - Depots and Zones - Depots** Users can create duplicate records within a Group by continuing to drag & drop Depots against groups.
JF-3015	**JF - Depots and Zones - Depots - Search & Setup** Depot Setup > EDI 'Export Runsheet Consignments' option should not exist for Depots (only for Subcontractors)

JF-2692	**JF - Distribution - Despatch** Planning Pad > Pickup Status won't update automatically to 'Pickup Allocated' when linked Pickup is un-arrived
JF-3349	**JF - Drivers - Reports** Driver Trip Report incorrectly including 'to be assigned' driver for the Second Driver
JF-3386	**JF - Fleet** Fleet Groups of name "Default" are showing cross entity
JF-2106	**JF - Fleet - Main - Fleet View** Fleet View - Subcontractor View
JF-3046	**JF - Fleet - Reports** Exception when printing Local Ops Activity Report with selected Driver
JF-2677	**JF - Freight - Consignments** 1-2-1 XDock Consignment Remains Locked After PUP Completion due to POD Completing Delivery Leg
JF-3103	**JF - Freight - Consignments** Trailers column changes to all zero values when other columns removed.
JF-3201	**JF - Freight - Consignments - Add/Edit/View** Allow and Prompt User when Consignment Removed from Trailer Load when Admin Status is Released for Invoicing
JF-3029	**JF - Freight - Consignments - Add/Edit/View** CN Cash Sale Tax Invoice prints using template set in System Setup not in Debtor Settings
JF-2974	**JF - Freight - Consignments - Add/Edit/View** Completion of Local Job PUP via PUP/DEL Attempts Completes and Instantly Rolls Back Status
JF-3371	**JF - Freight - Consignments - Add/Edit/View** Consignment is released through Freight, even when selecting 'No' on the release prompt
JF-3427	**JF - Freight - Consignments - Add/Edit/View** Consignment Links to Manifest and Trailer Load can be Avoided Via Planning Pad
JF-3234	**JF - Freight - Consignments - Add/Edit/View** Consignment Status reverts to Awaiting Pickup instead of Unshipped after Pickup is made Futile

JF-3094	**JF - Freight - Consignments - Add/Edit/View** Cost Split Value Remains in Parent Consignment after Split is Cancelled
JF-2806	**JF - Freight - Consignments - Add/Edit/View** Default Pre-forwarder is not auto-populating on CN form
JF-3284	**JF - Freight - Consignments - Add/Edit/View** Disallow Repeat, Recharge, Create Split, OnShip and Pallet Docket creation for Closed Debtors
JF-3420	**JF - Freight - Consignments - Add/Edit/View** Finish Time Populated Upon Delivery Complete Disregarding 'Auto Populate Start Finish Times' Setting
JF-3239	**JF - Freight - Consignments - S&L** Duplicate Rows in CN S&L when Split CN is Transhipped
JF-2801	**JF - Freight - Consignments - S&L** Restore is not working for PU/CN/Job that were cancelled from S&L
JF-3095	**JF - Freight - Consignments - S&L** Transhipment Consignment Print Options Missing when Opened from CN S&L or its Parent CN
JF-716	**JF - Process** PUD Delivery Cost & Timeslot Cost is not posting to the correct Cost Centre when Transhipping
JF-3110	**JF - Process - Forwarding - Invoice** Forwarding Invoice Allows Empty 'Invoice #' Field Which Creates Duplicate Transactions After MF Process
JF-3083	**JF - Tools - Setup - System Setup** Linehaul lane rate deletion does not remove all required records from Linehaul table.
JF-3456	**JF - Tools - Setup - System Setup** New items on Driver Check List Items that are created on Entity 2 are showing on the list in Entity 1
JF-3305	**JF - Tools - Setup - System Setup** Zone Override Icon is not always present depending on how Consignment is opened
MDS-54 Patch .2	**JF - Imaging** Auto-deliver brought in line with other completion methods

JF-3775 Patch .2	**JF - Consignments** Delivery Leg Not Updating In Allocations when Delivery Required Date is updated on CN/Job Form
JF-3610 Patch .2	**JF - Manifests** Performance improvements to Linehaul Manifest Arrive

Customers

JF-2899	**JF - Customers - Customer Rates - Search & Setup - Breaks** Can't remove/delete LH Code selection in Unit setup in Customer Rates
JF-3279	**JF - Customers - Customer Rates - Search & Setup - Lanes** All lane Prices are zeroed when moving down from auto filter row to a single result
JF-2797	**JF - Customers - Customer Rates - Uprate** Uprate > Weight and Unit Prices are not correctly rounding off when setting is '2'
JF-3216	**JF - Customers - Senders & Receivers - Search & Setup - Main** Site Contact Details Updating Sender Receiver Record and Not Updating Consignment

Distribution

JF-3040	**JF - Distribution - Despatch** Planning Pad > Trailer Load Grid showing incorrect values immediately after LH split created
JF-2659	**JF - Distribution - Despatch - Allocations** Able to Cancel PUP with Linked CN on TL via Allocations
JF-2987	**JF - Distribution - Despatch - Allocations** Allocations > Runsheet Grid > Conditional Formatting saved within a default profile only applies after switching to other profiles then back to default
JF-2651	**JF - Distribution - Despatch - Allocations** Allocations Screen > 'Despatch Allocation Display Settings' - Not displaying for 'Pending Arrivals' or when Grey Highlight of row appears
JF-2650	**JF - Distribution - Despatch - Allocations** 'Display Delivery Consignment On Del. Req. Date' not Working for Transhipped Consignments

JF-3472	**JF - Distribution - Despatch - Allocations** Local Consignment not automatically showing on Allocations > Unshipped grid
JF-3450	**JF - Distribution - Despatch - Allocations** Runsheet Grid needs to manually refresh to display runsheets
JF-3428	**JF - Distribution - Despatch - Allocations** Runsheet Panel Fleet Code Selection Issue
JF-3460	**JF - Distribution - Linehaul - Unshipped Planning** After allocating Consignments from Unshipped Consignments to Planning Pad the Unshipped Consignments grid resets
JF-2933	**JF - Distribution - Linehaul Manifests - Add/Edit/View** Able to Delete Trailer Load from a Load Managed Manifest After the Consignment has been Invoiced
JF-3136	**JF - Distribution - Linehaul Manifests - Add/Edit/View** Consignment printing is not allowed on Departed/Arrived Manifest with Trailer Load
JF-2488	**JF - Distribution - Linehaul Manifests - Add/Edit/View** Direct Drop Split Not Updating Parent Transshipment Consignment Status When Arrived
JF-3317	**JF - Distribution - Linehaul Manifests - Add/Edit/View** Manifest > Pallet Space calculation is not ignoring CN Detail Lines with Units selected to not show
JF-2908	**JF - Distribution - Linehaul Manifests - Add/Edit/View** Manifest Driver Trip Plan has stopped Considering Changeover Point Selection
JF-3370	**JF - Distribution - Linehaul Manifests - Add/Edit/View** Processed Manifest deductions Fuel GST doubling when opened
JF-3012	**JF - Distribution - Linehaul Manifests - Add/Edit/View** Unsaved MF Arrival Via MF Form Instantly Removes Line From LHC Until Refreshed
JF-3232	**JF - Distribution - Reports** No Layout Data Exception attempting to Run Pre-Defined Trailer Load Reports
JF-3333	**JF - Distribution - Runsheets - Add/Edit/View** Runsheet > 'Do you want to save changes?' prompt is showing even without changes when closing a Completed Runsheet

Portal

General

JPT-398	**Portal** Issues with Portal Status History Grid Populating Manifest Arrived DateTime Incorrectly
JPT-402	**Portal** Latest Statements only Updating when Override Debtor Settings and Print is selected for Debtors marked to not print physical copy
JPT-382	**Portal** Object Reference exception on creating a new row on the new line of creating a new CN/Pickup
JPT-409	**Portal** Pickup Notification Recipients Not Populating when Prompt User to Confirm Recipients is Enabled
JPT-415	**Portal** When a Consignment is Released via Portal Always Log that the Consignment has been Released
JPT-506 Patch .2	**Portal** Creating Freq Sender/Receivers in Portal - Email being saved incorrectly

MapView

JMV-52	**MapView** Geofence Search & List Showing Contacts and Fleets menu tabs
JMV-55	**MapView - Admin - Geofence** Geofence - Unable to Remove Linked Depot, SR, Group

Mobility

JAIX Driver

MMB-1000 Patch .1	**Mobility - Driver** Device API creating duplicate Delivery Records

SmartSCAN (Freight)

MMB-807	**Mobility - SmartSCAN (Freight)** Some SmartScan logs are being written at the device's time instead of the depot time
MMB-1094Patch.1	**Mobility - SmartSCAN (Freight)** Cannot scan LPNs for a DSA when LH Split CHILD becomes the DSA

SmartSCAN (WMS)

MMB-655	**Mobility - SmartSCAN (WMS)** Location Scan for SSCC inward cause Form Context Error
MMB-1051Patch.1	**Mobility - SmartSCAN (WMS)** SmartSCAN Stocktake Job List breaks when the number of Jobs and Locations being sent from the API exceeds 10MB

WMS

General

JWM-851	**WMS - Customers - Rates - Find/Setup** Entering Text into 'Charge Type' in Break Rates can cause a string of errors, including Rates with no Breaks
JWM-989	**WMS - Operations - Activity** Some docket controls are disabled after selecting a Debtor without an active breakrate
JWM-996	**WMS - Operations - Activity** Using a custom docket number and moving through fields quickly can cause an error
JWM-999	**WMS - Operations - Stocktake** Deleting a logged discrepancy removes LPN detail from a Stocktake on Confirm
JWM-975	**WMS - Process - Generate Invoices** LPNs in Picked Status for multiple periods are not charged Storage the week before they are confirmed.

Workshop

General

JWS-407	**WS - Inventory - Products - Master Products** Unable to add Site Options to specific branch within Master Product setup.
JWS-469	**WS - Jobs - Jobs - S&L** Job Search & List Date Range Filter including Jobs dated 1st of the Next Month using UTC Time
MDS-73	**WS - Tools** Reference 2 and 3 are not retaining against image data
JWS-480	**WS - Tools - Setup - System Setup** Exception when using Copy from Branch in Workshop > System Setup > Branch

Task Legend

GEN	General/Global

JF	JAIX Freight
JS	JAIX Service
JWM	JAIX WMS
JWS	JAIX Workshop
MEDI	EDI
MMB	Mobility
MRP	Reports & Forms

v22.21.1

GEN-591	User printer selections are clearing when using redirected printers
GEN-584	Update the Default ETA Update Interval in the Location Service to 30 minutes
GEN-575	Enable HTTP Response Compression
GEN-536	Password Reset during Login Matching on Full Name Instead of User

JA-1034	Create ABA Not Releasing Held Remittance Emails
JADM-188	Two active login displays on View Logins after changing a new PW for the user.
JF-3777	Arrive and Complete button are not enabled in the Runsheet summary after activating the Runsheet
JF-3767	Un-allocating Consignments moves them to MF - Pending Arrival incorrectly
JF-3765	Allocations Screen - Show 'Pending Arrivals' setting will not hold on profile
JF-3750	Delivery was not displayed on the Allocation screen of the final receiving branch when Auto Create Delivery Split is Off
JF-3748	Runsheet/Fleet Summary Complete Options still available despite being completed through mobility
JF-3746	ACTIVATING Pre-Assigned Runsheet - Allows activation with interstate deliveries that have not yet arrived
JF-3743	When printing Customer Rates I require any discount off Schedule prices to be reflected
JF-3729	As a Freight User I would like the Ability to See Charges Against Held Consignments / Jobs
JF-3723	Pre/On-Forwarders and Subcontractors set against the CN - Issues with SPACE and ITEM Units
JF-3615	Allocations Fleet Summary Showing Pre-Allocated Legs On Wrong Days
JS-82	Emails sent via the Scheduler can have the incorrect subject of an Auto Journal
JWM-1525	Improve Pick Auto Allocate Performance by not repeating expensive Regex operations
JWM-1521	Fix Confirmed Only Exception and Remove Relocation as an option
JWM-1511	Handling weight is not initially being added to total on DocketSetupForm for Picks

JWM-1510	SSCC Label Qty is not showing in Proper format
JWM-1508	Stock Base UOM Cannot Be Found When All UOMs Are Inactive When Viewing Historical Stock
JWM-1506	Add Picked and Invoiced database fields to the Docket table
JWM-1505	EX WH Job/CN Cubic calculated incorrectly on CN
JWM-1503	Custom Pick Allocation Priority Not Observing Storage Type
JWM-1502	Pick > Auto-allocate failed to match specified Date when SOH has batch and/or serial
JWM-1499	Backordered stock can be allocated and confirmed leaving it in stock, but reserved
JWM-1493	Disable Pick Auto Allocation not working
JWM-1491	Putaway > Allocate Screen > Handling Unit Type selection is showing duplicates and disabled handling types
JWM-1417	Allocated Stock not displaying in correct order after "allocating ALL' against a partially allocated docket, and then changing the allocations again.
JWS-605	Cost Each issues in AMP > UOM cost is divided by total
JWS-604	Workshop Create Pick Docket from Job attempts to auto allocate Pick Docket multiple times
JWS-603	Preferred Location Not Printing on LPNs in Workshop
MEDI-588	EDI Import > Consignment From/To Zones not Filtered By Entity
MEDI-578	Warehouse Stock Importer Creating LPN's via Test Function
MEDI-563	Duplicate hardcoded SAP IDOC EDI Format to Bind Cubic, set Consignment Number prefix and Default Service Code

MEDI-377	XMLV2 Not formatting Additional References correctly on import
MMB-1094	SmartSCAN (Freight) > Load Runsheet - Can NOT scan LPNs for a DSA (when LH Split CHILD becomes the DSA)
MMB-1051	SmartSCAN Stocktake Job List breaks when the number of Jobs and Locations being sent from the API exceeds 10MB
MMB-1000	Device API Creating Duplicate Delivery Records
MRP-325	Invoice Process CSV Xero Format - Additional Charge Fuel Levy issue

v22.21.3 (Was combined with v22.21.2)

JADM-201	PasswordChangedDateTime not updated by backend Admin Service when password changed
