Patch Summary

Symbol	Meaning
	Major or Special Interest Task
	Refer to attached set up and usage instructions
	High impact task

CRITICAL UPDATE NOTES

	SMARTSCAN (Freight + WMS) Version 22.21.0 and beyond is not backwards compatible with prior versions of SmartSCAN. Update to or past the 22.21.0 version requires update of the SmartSCAN application to the relevant matching version.
---	---

MEDI-459		EDI Formats Docket EDI will now reference Product level default EDI In/Out UoMs first over EDI Profile UoMs. This may impact some existing WMS EDI's and we recommend reviewing your active EDI's to assess
JADM-123		Email Queue Implemented new functionality for Admin users to Release Held Emails from within the Email Queue

MEDI-504		EDI Formats UoM Config Set can now be mapped with Docket EDI Imports and Exports
MEDI-437		EDI Partially successful imports can now be setup to move to a unique folder after import. This location will default to your standard Imported Folder. Please contact the Service Desk should you wish to setup a separate folder
MEDI-567		EDI Formats Added the ability to specify UoM within Docket Import EDI. This manages scenario's where movements are imported for variable UoM's
MEDI-579		EDI Formats Additional fields added to Docket Export EDI Mappers to export Layers per Pallet, Pick UoM per Layer and Pick UoM per Pallet
MEDI-593		Internal API A new Internal API End Point has been added for Consignment Lookup
MEDI-584		Internal API A new Internal API End Point has been added for Consignment Cancellation

Patch Summary

ACCOUNTS

JA-507		Creditors - Purchase Orders Added Processed and Complete actions to Purchase Order audit logs
JA-542		General Ledger - Transactions Resolved tab/focus on GL Transactions to not skip Auto Reference 1 when enabled
JA-492		Tools - System Setup Modified Debtor functions 'Allow set Debtor Finance' and 'Do Not Force Master Account Full Allocation' to only be accessible via JAIXADMIN user
JA-975		Creditors/Subcontractors - Unpaid Invoices Made the Hold flag writable on the Creditors and Subcontractors' "Unpaid Invoices" grids

JA-835	Debtors S&L Added Commenced Date column to Debtors/Customers Search & List grid
JA-1045	Subcontractor Setup Added 'Via Forwarding Invoice' to the CN Forwarding Payment Settings of Subcontractors
JA-1006	Tools - System Setup Resolved issues involving UI particularly in Company web address, Bulk Email, Creditor and Subcontractor Contacts, and Debtor Online Settings
JA-1013	Subcontractors - Reports New Subcontractor Monthly Spend report added that shows monthly spend for all subcontractors over a 12 month period
JA-1012	Creditors - Reports New Creditor Monthly Spend report added that shows monthly spend for all creditor accounts over a 12 month period
JA-1008	Debtors - Reports New Debtor Monthly Sales report added that shows revenue from each debtor, excluding GST, over a 12 month period
JA-1003	Debtors - Transactions Updated Allocate transaction function on Master Account to only allow allocation of a master account receipt
JA-1039	Creditors/Subcontractors - Unpaid Invoices Logs are now being created against the Creditor or Subbie when releasing invoices for payment
JA-1038	Creditors - Purchase Orders Added the detail of the approver's name to the Purchase Order audit logs when Purchase Order is finalised

FREIGHT AND OPERATIONS

General

JF-3798		Tools - System Setup Updated Licence Plate Prefix setup to accept more characters
JF-3796		Tools - System Setup Updated Consignment Prefix setup to accept more characters
JF-3797		Tools - System Setup Updated Distribution (Manifest, Runsheet, etc) based Prefix setup to accept more characters
JF-3761		Tools - System Setup Updated the Service Description field to be directly below the Service Code within Service Code setup
JF-2535		Sender/Receivers Updated Sender/Receiver default forwarder setup to allow selection of Non-RCTI Subcontractors
JF-3683		Tools - System Setup Updated Transit Time configuration to only populate zones from MAIN Zone Set within the Entity
JF-3627		Depots & Zones Added the Depot Branch and Primary Depot flag to the Depot S&L

Consignments

JF-3721	 	Consignments Consignment Pickup Ready At Date Time has been opened up for standard Consignments to assist with Pickup Ready At capture prior to Pickup creation for Consignment First workflows. Please see linked Task Manual for more information
---------	--	---

JF -3 85 3		Consignment S&L Added a New Batch Action function within Consignment and Job S&L to perform Validation (Rating). Allows Consignments to be re-validated in bulk. Full access to the Consignments or Jobs areas is required on the users User Role to access this function
JF -2 96 0		Customers - Rate Proposals Added a tooltip to the Minimum CN Weight (KGs) field of Rate Cards to better explain the functionality
JF -2 70 0		Jobs Updated Jobs to work correctly with zone overrides
JF -2 50 0		Consignments Increased the Consignment field UI length from 20 to 30 characters and also updated to allow special characters to be entered
JF -2 51 4		Consignments - Pallet Dockets Added the Chep and Loscam Pallet Control Account Numbers to the Pallet Docket Form (Read Only)
JF -2 51 0		Consignments - Pallet Dockets Added an improved status workflow for Pallet Dockets providing visibility of Dockets that are Not Exported, Exported or Cancelled. Also improved Consignment Cancellation to include Pallet Dockets, including an Email notification to the Pallet Controller if the Docket is Exported
JF -3 47 9		Jobs Updated Jobs to correctly validate the Local Zone Last Ready At and Close Time Functionality
JF -3 85 0		Consignments Header fields will now update correctly across 1-2-1 Pickup/Consignments

JF -3 85 8		Consignments Access to the Pre/On Forwarders section on Consignments is now given regardless of the relevant Sender or Receiver zone being setup VIA a Depot.
JF -3 92 1		Consignments Removed logic to prevent copying any values in Consignment Forwarder fields from the parent Consignment to its child Transhipments
JF -3 91 3		Consignment S&L Added the ability to click to view all additional References from the First Additional Reference field from the Consignment and Job S&L
JF -3 91 4		Consignments - Pallet Dockets Added an additional format for Exporting Pallet Dockets to 2IC from the Pallet Docket S&L

Distribution

G E N- 58 3	 	Consignments - EDI A first stage of Customer SMS notifications has been implemented into JAIX Freight EDI. This allows customers to be notified via SMS for some key milestones such as: <ul style="list-style-type: none"> Your Pickup or Delivery has been scheduled Your Pickup or Delivery is next in line (Driver is on their way) Your Pickup or Delivery has been completed Please see linked Task Manual for more information
JF -3 39 8	 	Consignments - Break Bulk A first stage of functionality has been implemented to assist with Break Bulk management. This first stage is focussed on the ability to link child Break Bulk Consignments to a Master Consignment to manage Linehaul Movements and reflect status accordingly. <p>Please see linked Task Manual for more information</p>

JF -3 86 5	 	<p>Consignments - Depot Arrival</p> <p>New functionality has been added to allow Consignments to be Arrived into both the Sending Depot and Receiving Depot, outside of standard Manifest Arrival functions.</p> <p>Please see linked Task Manual for more information</p>
JF -3 73 7	 	<p>Manifest Process - Subcontractor Payments</p> <p>New functionality has been added to allow payment of a Subcontractor Manifest prior to the Manifest being Processed by the Manifest Process. This ensure Subcontractor Payment is not held up by other customer related disputes that might be holding the Manifest from Process.</p> <p>Please see linked Task Manual for more information</p>
JF -3 85 4	 	<p>Consignments - Transshipment</p> <p>The Pre-forwarder, Local Sub-contractor and On-forwarder sections within the Consignment are now enabled for Transshipment Consignments. This allows more Subcontractors to be managed within a single Consignment delivery workflow compared to the previous 3 Subcontractor limit from the main Consignment.</p> <p>Please see linked Task Manual for more information</p>
JF -3 82 7		<p>Linehaul Manifests</p> <p>Implemented the Ability to Specify Asset Axle Weights within the Manifest.</p> <p>Please see linked Task Manual for more information</p>
JF -3 28 2		<p>Linehaul Manifest S&L</p> <p>Added 'Created By' column on Manifest Search & List grid</p>
JF -3 71 4		<p>Linehaul Manifest S&L</p> <p>Added new columns to the Manifest S&L for "Has LH PUP" and "Has Direct Delivery"</p>
JF -3 67 6		<p>Linehaul Manifests</p> <p>Implemented the ability to Change Linehaul Code on an Arrived Manifest and Allow Change Resources on Subcontractor Manifests</p>

JF -3 84 7		Linehaul Manifests Manifest Transshipment Validation will now be skipped for Manifests with the same From and To Zone
JF -3 81 6		Linehaul Manifests Implemented an update on the Manifest Paperwork Return to use the Paperwork return dialogue box. More information regarding these changes are available in the task manual for Enabling Single Manifest Load Payment Posting
JF -3 71 6		Local Allocations - Unshipped Consignments Added the Consignments General and Receiver Instruction fields to the column chooser of the Allocations > Unshipped Consignments grid
JF -3 73 4		Distribution - Unshipped Planning S&L Added two new columns to the Unshipped Consignment S&L called "Pickup Trailer 1" and "Pickup Trailer 2"
JF -3 71 5		Local Allocations - Unshipped Consignments + Distribution - Unshipped Planning S&L Added the "Held" column to the Unshipped Consignments grids (both in Allocations and the main Unshipped Consignments S&L)
JF -3 80 9		Linehaul Console Removed the Requirement to flag a Trailer Load as Delivered
JF -3 77 9		Trailer Loads Added fields for Charge To, Sender Reference, Receiver Reference, and Service Code on Load Sheet form

Wharf

M W H- 32 2		CPA S&L Added the LDM No. column within CPA S&L - Job Legs for Container No. grid.
-------------------------	--	--

Global Accounts Freight WMS Workshop Mobility Web Portal Issue Resolution v23.23 Task Manuals

JF-2676	Customer - Rates S&L Removed 'Expired' Proposals from Rates Search&List 'Activated' View list
JF-2520	Process - Reports Fixed the issue when New Freight Customer Report is not reporting anything. Report is available to Head Office only
JF-3640	Linehaul Manifests Tidied up the events for the Linehaul Manifest "Would you like to release for Processing?" prompt to show only when appropriate

JF-3628	Consignments Fixed an issue where the Consignment remains locked when a 121 Local Direct Consignment has the Pickup completed and the receiver is then changed to be interstate
JF-3616	Allocations - Despatch Disposed vehicles will no longer show on Available Fleet/Runsheets Grid
JF-3625	Consignments Auto PUP Linking will no longer allow linking to Futile PUP's
JF-3565	Consignments Removed the ability for On-ship consignments to be created from transshipments and splits
JF-3563	Customers - Copy Rates Fixed the error displayed when copying rates to a new proposal after changes have been made to the 'To Customer' field
JF-3569	Consignments Senders Reference will now display correctly within 'Linked Consignments' popup
JF-3582	Consignments Prevent actions occurring on an Invoiced Consignment that could result in reverting Admin Status backwards allowing Consignment to be invoiced again
JF-3836	Consignments Charge To field populated from Sender/Receiver default Charge To logic will no longer show the Charge To Debtor ID instead of the name when the Debtor was made inactive
JF-3661	Customers - Rate Proposals The Customer Rates User Role Permissions have been updated to more accurately control functionality

JF-3672	Consignment S&L Clearing All Marked Consignments from the Consignment S&L will no longer break the Add to Trailer/Manifest functions
JF-3666	Quick Quotes Fixed an issue where Ready At Date/Time is not being correctly set on Jobs created from a Quick Quote
JF-3659	Quick Quotes Fixed an issue where CN/Job details created from Quick Quote are incorrectly populated with values from the Sender/Receiver record rather than reflect the values saved against the Quick Quote
JF-3731	Invoice Process A Null Charge Reference will no longer cause an Object Reference Exception During Invoice Run Due for customers Invoicing by Charge Reference
JF-3725	Quick Quotes Ready at Date/Time will now populate correctly in the Acceptance Email when approving a Quick Quote
JF-3782	Consignment S&L CN Transshipment Hyperlinks in Consignment S&L will now correctly open the CN Tranship form
JF-3776	Consignments Percentage Additional Charges are now applying to Distance Rated Consignments and Jobs
JF-3766	Tools - System Setup Updated the Freight System Setup and other locations where Consignment Note Label forms can be selected to include both A5 and A4 CN Label Forms and their variants
JF-3825	Consignments Save and Update buttons will no longer be enabled on Exported Pallet Dockets if the user

	role permission 'Pallet Docket - Edit After Export' is disabled
JF-3813	Linehaul Manifests Updated some scenario's where the Linehaul Manifest Load payment was not rerating
JF-3762	Linehaul Manifests / Linehaul Console Fixed an issue where users were allowed to confirm the linehaul manifest even when the second driver does not have the required accreditation level for the linehaul lane
JF-3753	Tools - System Setup Fixed an exception error occurring if the JAIX Admin Compliance Email Address has more than one email address entered
JF-3842	Consignments The Edit Delivery Split function is now available after the Consignment has Arrived at Receiving Depot
JF-2818	Tools - System Setup Restricted deletion of system-created Manifest Pay Methods
JF-3072	Co.Fleet S&L Fixed the issue when the Co.Fleet S&L 'Next Destination' does not reflect Co.Fleet's actual 'Next Destination'
JF-3248	Pickups Service Code at Detail Line level is no longer editable for a 1-2-1 PUP/CN
JF-2104	Consignments Delivered Consignment Status will no longer roll back if the Delivery Address is updated
JF-3658	Consignments - Process A Consignment can no longer be invoiced twice by restoring a Manifest Process that was performed after the Consignment was already invoiced via an earlier Process

JF-3288	Linehaul Manifests Confirm Pay will no longer reset to 0 for Pallet Space rated Manifests
JF-3875	Allocations - Despatch Allocations screen will no longer raise an exception when receiving data events during refresh
JF-3292	Consignments Resolved a date conversion issue with the Stat Charge Effective From date
MW H-327	Jobs - Wharf Wharf Jobs now allow user to override the rated amount

Portal

JPT-342	WMS - Create Docket Entering the same product multiple times in the Product details grid will no longer cause a validation error
JPT-516	WMS - Create Docket Restricted sender/receiver name and address fields to the maximum field length set in database
JPT-257	Freight - Quick Quotes Resolved some errors with Quick Quote detail line functionality

Workshop

JWS-472	AMP - Jobs ODO reading on a finalised job now updating the Reading History
---------	--

JWS -465	All Services Due Deferred comment is now showing and no exception error thrown
JWS -527	WS - General Issues with User Role access in Workshop are now resolved
JWS -483	Issues Workshop Issues Restore button is only visible when the status is Dismissed, and only enabled when not readonly or locked
JWS -613	All Services Due Refreshing the All Services Due grid will no longer lose changes
JWS -624	Inventory - Products S&L Resolved arithmetic overflow exception thrown on Product Setup and S&L when excessive weight value is auto-calculated

WMS

JW M-1 052	Products S&L Resolved arithmetic overflow exception thrown on Product Setup and S&L when excessive weight value is auto-calculated
