ACCOUNTS

JA-950		General Ledger - Reconciliation - Reconcile A new 'Reconcile - Edit Brought Forward' user role permission has been added to control edit access to the brought forward amount within the Bank Reconciliation function
JA-912		View Transactions A new 'View Bal' column has been added to all View Transaction screens that will provide a running balance of only displayed lines (taking into account grid filtering)
JA-969		Subcontractors - Local Invoices Fleet 'Rate per Hour' now supports a historical 'Effective From' setup structure allowing Subcontractor Local Invoices to find the correct Rate Per Hour based on Invoice Date.
JA-503		Tools - Form Manager Debtor Suburb, State and Postcode have been added as separate fields to the Freight Invoice CSV data set

JA-751		View Transactions A new User Role access permission has been added to control access to Transactions Unallocate All / Auto Allocate All functions
--------	--	---

Global Accounts Freight WMS Mobility Web Portal Issue Resolution Patch Summary

FREIGHT AND OPERATIONS

General

JF-3383		Fleet - Fleet View Fleet Rate Per Hour will now support Effective From History for calculation of Rate per Hour by Invoice Date when processing Local Invoices
JF-1966		Drivers - Drivers Added Last Destination, Next Destination, and Resource Status columns to the Driver Search & List
JF-3743		Rates - Print Added a new Print Rates options to allow schedule rates to be printed with the schedule % reflected. Note this feature is released in patch 22.21.1

Consignments

JF-3437	 	Freight - Jobs - Add Edit View Job Commission calculations have been updated to include the Fleet 3 Subcontractor. Please refer task manual for more information
JF-3422		Freight - Consignments - Add Edit View Changing Unit Group on a Consignment/Job detail line will attempt to match the unit in the new group, else clear
JF-3079		Freight - Consignment/Job - Search & List Added Cash Sale 'Payment Received' and 'Date' to CN / Job S&L

JF-3561	 	Freight - Consignments - Add Edit View Additional Charges can now be setup to charge at \$/Tonne
JF-2979	 	Freight - Consignments - Add Edit View Additional Charges can now be setup to Auto Apply at Sender Receiver level
JF-3421		Freight - Jobs- Add Edit View New setting to calculate Fuel Levy Commission when overriding Job Fleet Commission . Please refer task manual for more information
JF-2856		Freight - Consignment/Job - Search & List Delivered Date has been added to the Consignment & Job Search & List
JF-2113		Freight - Consignments - Pallet Dockets The keyboard shortcut for the Close button within the Pallet Docket interface has been updated to the system default of Ctrl-W to prevent conflict with the standard 'Copy' shortcut Ctrl-C
JF-3138		Freight - Consignment - Search & List Additional filters added to Consignment Search & List hamburger menu to filter by Sender and Receiver

Distribution

JF -3 33 1	 	Distribution - Linehaul Console Subcontractor Management added to Linehaul Console. Please refer task manual for more information
JF -2 89 2		Tools - System Setup - Linehaul Rates Decimal accuracy increased in the Linehaul Rates setup table
JF -2 63 5		Distribution Added logging to Consignment, Trailer Load, Load Plan, and Manifest when printed

JF -2 33 4		Distribution - Linehaul Manifest Trailer Load Consignments prompted for Tranship will now log the user decision to create Transhipment. Validate Destinations (Tranship) function will now also be available from Trailer Load form at any stage of the Trailer Load distribution process
JF -3 60 0		Distribution - Runsheets - Search & List The ability to Filter on Pre-Assigned and Cancelled Runsheets has been added to the Runsheet S&L
JF -3 06 9		Tools - System Setup - Linehaul Rates Linehaul Codes can now be flagged to "Do Not Show". Primary use for this is to hide internal Linehaul Codes (e.g Transhipment code)
JF -3 41 8		Distribution - Runsheets The system will no longer prompt for a comment upon Runsheet completion. A new "Force Completion Comment" setting has been added to branch level Despatch settings to turn this back on if required
JF -3 34 7		Distribution - Linehaul Manifests User will be prompted to re-flag Manifest as 'Do Not Process' if new Unreleased Consignments are added to the Manifest
JF -3 66 7		Distribution - Linehaul Manifests Manifests can now be auto-Arrived at completion of the final Direct Delivery
JF -2 46 2		Tools - System Setup - Linehaul Rates Auto-Filter row has been added to the Linehaul Rates setup table
JF -3 13 2		Distribution - Linehaul Manifests Manifest Cost Report has been updated to use the Prime Mover Cost Field when MF using Trailer Load Accrual

M W H- 24 6		Wharf To manage cross dock and storage of unpacked Container Freight a new feature has been developed to automatically create WMS Putaways from Container Movements into the depot that are linked back to the Container Movement details. Please refer to the linked task manual for more information
-------------------------	---	--

Global Accounts Freight WMS Mobility Web Portal Issue Resolution Patch Summary

JW M- 13 33		Operations - Track - Stock Container Number has been added to WMS Dockets for integration with the JAIX Wharf module
JW M- 14 20		Customers The 'Set CN Detail Ref as Serial' setting has been expanded to provide multiple options to select from. Container Number is a new option added here to provide visibility of Wharf Containers through WMS and into Freight
JW M- 12 86		Operations - Activity - Putaway/Pick A new 'Rated As' method has been added to Break Rate Setup for '\$ Per M3/Tonne'. This method will rate the higher value of either Cubic (m3) or Weight (tonne)
JW M- 14 82		Customers A new "Detail Grouping" method has been added to Pick Consignment Detail Settings to allow grouping by Product Group and Freight Unit
JW M- 14 79		Customers Freight UOM Conversions can now be configured for Non-WMS enabled Debtors. When creating a Consignment, if the selected Consignment Charge To Debtor has Freight UOM Conversions configured, these will be used over the WMS Docket Debtor

JW M- 14 81		Customers Freight UOM Conversions will now allow free text entry
JW M- 12 85	 	Process - Generate Invoices The Storage Free Periods function has been expanded to also allow Storage Free Days.
MR P- 28 7		Tools - Form Manager Container Number and CPA Number added to LPN dataset

Global Accounts Freight WMS Mobility Web Portal Issue Resolution Patch Summary

CRITICAL UPDATE NOTES

SMARTSCAN (Freight + WMS)

Version 22.21.0 and beyond is not backwards compatible with prior versions of SmartSCAN. Update to or past the 22.21.0 version requires update of the SmartSCAN application to the relevant matching version.

SmartSCAN

M M B- 89 2	 	WMS - Putaway A new 'Auto Select LPN on Putaway' function has been added to remove manual prompting during the Putaway process. Please refer Task Manual for more information
M M B- 89 1	 	WMS - Substitution Substitution function will now support substitution of allocated Licence Plates. Please refer Task Manual for more information

Task Legend

GEN	General/Global
JA	JAIX Accounts
JF	JAIX Freight
JS	JAIX Service
JWM	JAIX WMS
JWS	JAIX Workshop
MEDI	EDI

MMB	Mobility
MRP	Reports & Forms

v23.22.1

JS-86	FTP Service Failing FTP Connections Due To Invalid Fallback Condition
JF-3680	Exception thrown when creating a Delivery split on the CN
JF-3360	JF HO > Process > Release LDM > Update LDM(s) is not performing a split on fleet for CN Revenue and CN FL
JF-3835	Cancelled manifest appearing in current manifest S&L
JF-3822	As a Freight User I would like the Ability to Set ADouble LH Code and Allocate two A Trailers
JF-3873	As a Freight User I would like a Toggle to Control Interstate Pickup Consolidation. A new flag has been added to System Setup > Consignments > Pickup Settings (PUP), called "Do not consolidate Interstate Pickups. When enabled, the system will no longer consolidate Interstate Consignments for Pickup resulting in a single pickup per Consignment
JPT-455	<p>Implementation of new mobile friendly Track & Trace without Login page. This page represents the beginning of some Portal redesign occurring in the upcoming versions and is designed with more simple and clean UI that will scale and format based on the users device (Phone, Tablet or PC).</p> <div>  Critical Note For security, the ability to view scanned images without logging in has been removed. </div>
JWM-1567	Cannot cancel docket due to Already unallocated message
JWM-1561	Split out detail lines when creating Ex WH CN/Jobs when Detail ref is set to Container or Serial and handling UOM=Pick UOM
MEDI-658	Subcontractor EDI files are exported as CSV with extension ".csv" although the export format is set as XML

MEDI-602	Ability to update Consignments with existing Freight Licence Plate Barcode
MMB-957	As a JAIX Direct user I would like to see Wharf Related Fields within my job information
MMB-1114	SmartSCAN (WMS) Picks - Unable to confirm picks by scanning a unique Serial Number
MMB-1119	Jaix Driver Login Exception for non Entity 1 Fleet with Allocated Jobs
MWH-317	As a Wharf User I would like Additional Fields within Container Movement and CPA S&L
MWH-319	Cannot Complete CPA on CPA S&L when Cancelled Movements is linked to the selected CPA

v23.22.1

J A - 1 0 6 1	As an Accounts User I would like Subcontractor Local Invoices to use the Reference Captions configured in System Setup
J A - 1 0 7 7	GL Export function is re-exporting old data when export method FTP is selected
J F - 3 9 1 1	Resolved an issue with incorrectly applied Minimum when using Weight and Unit rating on the same CN/Job
J F - 3 9	1-2-1 Consignment Additional Charges Incorrectly Duplicated and Ignored (Validation Settings)

3 6	
J P T - 5 2 6	Resolved an exception running Stock On Hand in WMS Portal
J W M - 1 5 6 6	WMS can error if adding products to put dockets too quickly in succession
J W M - 1 5 7 4	Some WMS form dates are in UTC instead of local time zone
J W M - 1 5 9 4	Resolved issues when Printing Stock on Hand Detailed Report with Date Requirement Enabled Product that has SOH
J W M - 1 5 9 6	Added an option to use Pick or Put Qty for CN Qty on Ex WH CNs/Jobs
J W S - 6	Resolved an error in the inventory SOH report in Workshop

2 9	
M E D I- 5 5 9 	<p>As an EDI User I would like the Ability to EDI Export Pickup Related Events for PUP Created From CN.</p> <p>Under this task we have modified EDI logic for Consignments that are linked to a Pickup to trigger Pickup related events from the actual Consignment record instead of the Pickup record. Pickup related values will be loaded from the linked Pickup as required. Previously these events would trigger off the Pickup which would result in some Consignment level fields exporting blank - e.g Licence Plates.</p> <p>Please note this does not affect Jobs, 1-2-1 PUP/Consignments or a Pickup not linked to a Consignment</p>
M E D I- 6 5 6	<p>As an EDI User I would like the Ability to Complete Pickup for non 1-2-1 Consignment. Previously the Pickup Complete status update via EDI was limited to 1-2-1 PUP/Consignments only.</p>
M E D I- 6 7 5	<p>Subcontractor Manifest and Runsheets EDI Exports are now correctly handling missing Pallet Details</p>
M E D I- 6 7 8	<p>EDI Imported CPA Leg 1 is ignored when adding Leg 2+ (Wharf)</p>
M E D I- 6 8 0	<p>As an EDI User I would like the Ability to EDI Update Pickups. When Consignments are updated via EDI Update functions, the linked Pickup will now also be automatically updated provided it is only linked to this Consignment being updated</p>
M E D I- 6	<p>As an EDI User I would like the Ability to Nest XML Tags and Export Multiple CN's using XMLv2</p>

8 2	
M E D I- 6 8 4	EDI Import of LPN's Not Accepted when Detail Line Qty Matches LPN Count
M E D I- 6 9 1	Subcontractor EDI files for Export Live Allocations are exported as CSV even if the export format is set as XMLV2
M E D I- 6 9 2	EDI Update of CN Detail Line Results in Duplicate Pickup Detail Lines being Added
M M B - 1 1 2 2	Refresh issue in driver when Jobs remain on device until completed = disabled
M M B - 1 1 2 5	[WMS] Home Screen - Bring back the ability to location search by location name from SmartSCAN home Screen
M M B - 1 1	[WMS] Putaway - Only Validate Serial inwards against current SOH
